New Hampshire Patient Transportation and Restraint Data:

Involuntary Emergency Admissions to Designated Receiving Facilities
October 2020 – September 2021 Final Report

Passed and signed into law in July 2019, SB 177 included an explicit option of using ambulances or law enforcement for transportation of patients that have been identified as Involuntary Emergency Admissions (IEAs) from hospital emergency departments to New Hampshire Hospital (NHH) or other Designated Receiving Facilities (DRFs). The new language became law effective January 1, 2020. Included as part of that law is the requirement that NHH and DRFs collect information on all patients they receive as to how they were transported and whether restraints were used in the transfer. Annual reports will be shared with NH Health and Human Services Oversight Committee.

As background, an ad hoc stakeholder group came together in the fall of 2019 to ensure that SB 177 was implemented in a timely way. The group was led by the NH Hospital Association and the NH Community Behavioral Health Association; other participants included NH Hospital; NH Department of Health and Human Services; NH Department of Safety; NH Medical Society; Mental Health Center of Greater Manchester; NH Sheriffs Association; NAMI-NH; the Disabilities Rights Center; the Children's Behavioral Health Collaborative. Several hospitals, community behavioral health providers, and private ambulance companies also participated. There was a total of 7 meetings held, and the group developed a webinar explaining the new law, which was offered to stakeholders and the public prior to January 1, 2020 effective date.

The first report ("Year 1") covered the first nine months (January – September) of 2020. This report is the second year ("Year 2") representing the months of October 2020 – September 2021. All seven New Hampshire DRFs (Concord Hospital - Franklin[1], Cypress Center, Elliot Hospital, Hampstead Hospital, New Hampshire Hospital, Parkland Medical Center, and Portsmouth Regional Hospital) submitted data to the New Hampshire Hospital Association for aggregation.

Summary Stats:
Between October 2020 – September 2021, there were a total of 1,525 IEA transfers to NH DRFs with an average of 127 transports per month. This included:

- 1,447 (94.9%) adult (18+) and 78 (5.1%) child transports
- 624 (40.9%) transports by ambulance, 892 (58.5%) by law enforcement (sheriff or police), and 9 (0.6%) by other means
- 768 (50.4%) transports occurred without restraints, 751 (49.2%) with restraints applied before transport, 1 (0.1%) transfer with restraints applied during transport, 1 (0.1%) transfer with restraints removed during transport, and 4 (0.2%) transfer of unknown restraint status
- For the 753 transfers using restraints, 333 (44.2%) used handcuffs only, 124 (16.5%) used waistbelt only, 292 (38.8%) used a combination, and 4 (0.5%) were an unknown type.

[1] Formerly Franklin Regional Hospital, this DRF was acquired by Concord Hospital on May 1, 2021. This report refers to Concord Hospital – Franklin by the acquired name.

DRF Volume Summary: The table below displays the volume of IEA patients transported to each DRF by age group and month. If a patient was transferred to a DRF unit from another location in the same facility, this transfer was removed from totals as it does not qualify as an external transfer.

		2020			2021									
DRF	**Age Group**	**Oct**	**Nov**	**Dec**	**Jan**	**Feb**	**Mar**	**Apr**	**May**	**Jun**	**Jul**	**Aug**	**Sep**	**Total**
Concord Hospital - Franklin	Adult	18	17	11	11	11	16	13	10	9	16	7	10	149

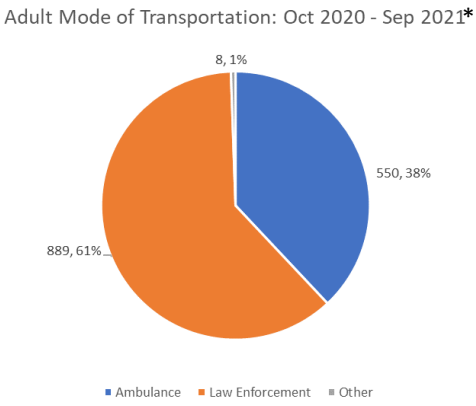
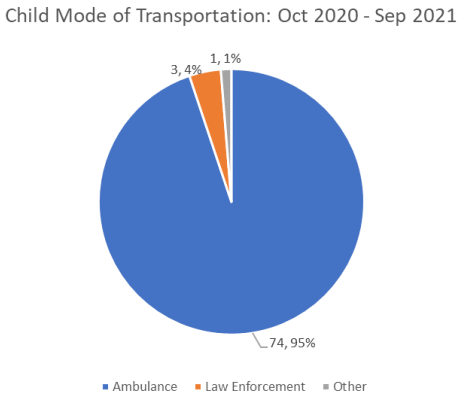
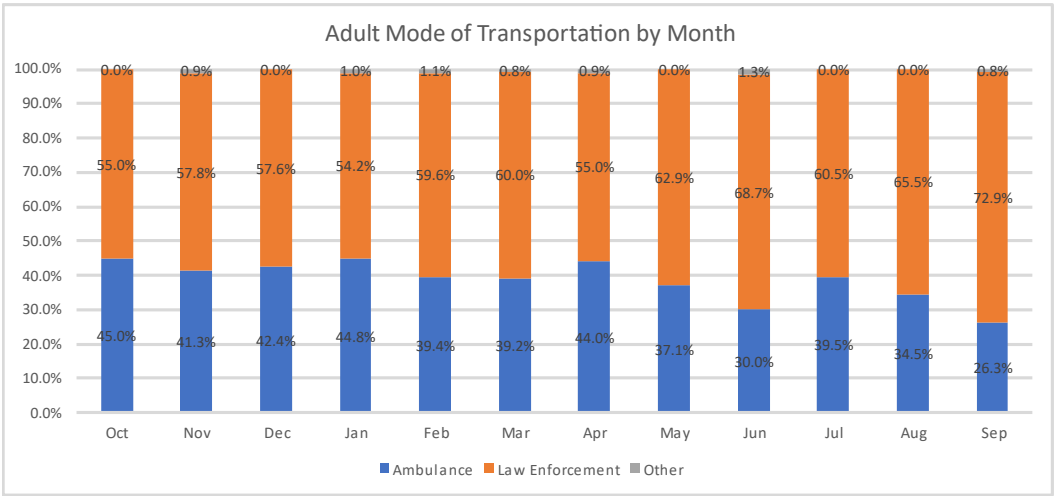
Total		**113**	**111**	**102**	**98**	**104**	**150**	**130**	**132**	**151**	**155**	**145**	**134**	**1,525**

Mode of Transportation Summary: IEA patients were transported to a DRF from a sending facility by law enforcement, ambulance, or other (e.g. facility staff). Children and adults experienced different rates of transport type in Year 2 with 61.4% of adults being taken by law enforcement compared to 3.8% of children or just 3 children in the entire 12-month period. For each month, the percentage of adults transferred by law enforcement varied between 54% and 73% with an average of 60.8%.

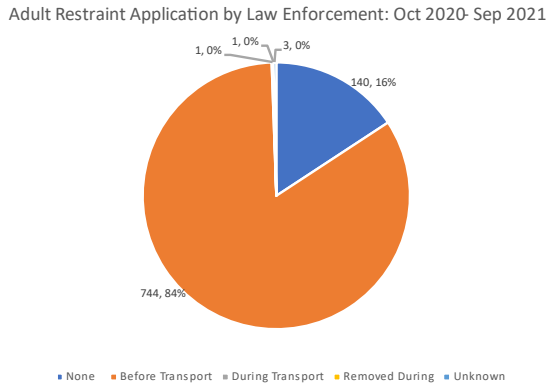


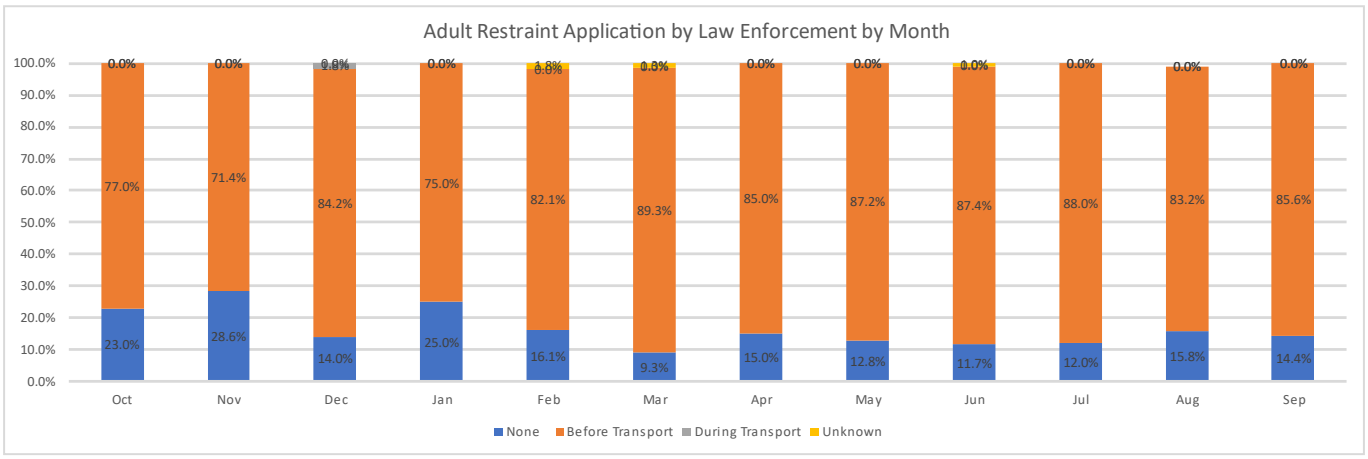




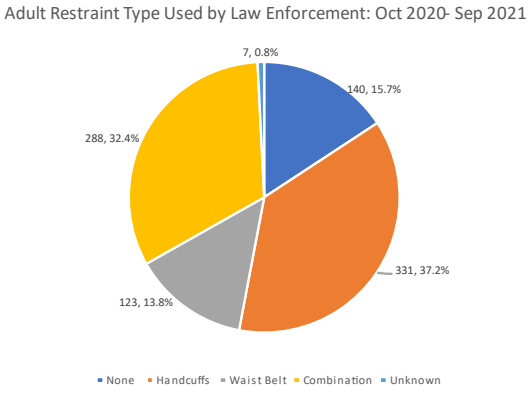
**Note: All pie chart data labels show total count followed by percentage of total*

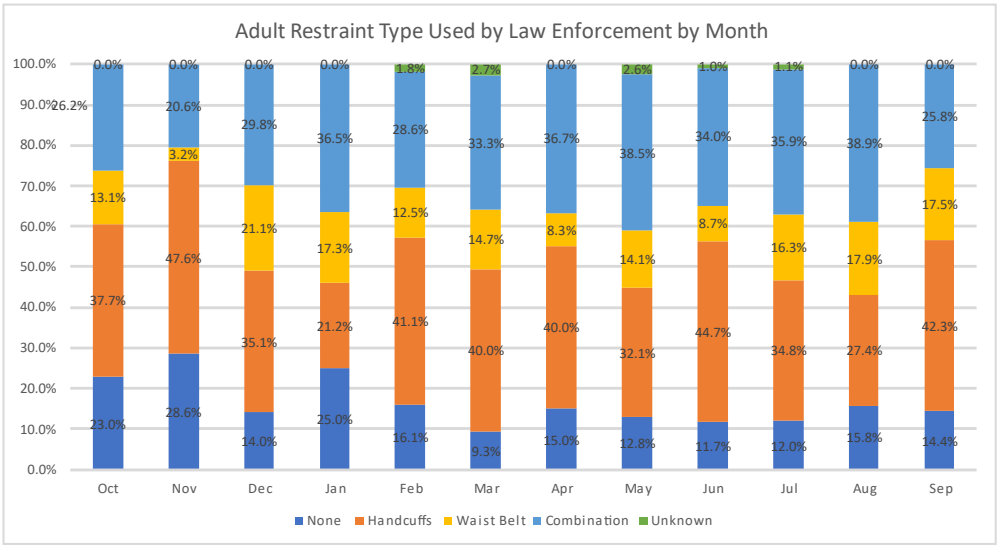
Restraint Application Summary: DRFs submitted data on restraint usage including the timing of restraint application - before or during transfer. Restraint application varied greatly by age group and mode of transportation. Restraints were used in 0% of ambulance transfers for both adults and children excepting 1 unknown adult ambulance transport. By contrast, 84.3% of adult law enforcement transfers used restraints. In Year 2 there were only 3 child transfers by law enforcement with 2 (66.7%) using restraints. See tables in appendix for full details.





Restraint Type: Varying restraint types were used on IEA patients during transfer. Most restrained transfers utilized handcuffs or a combination of restraint types. Charts below show information for adult law enforcement transfers. See tables in appendix for full detail on restraint types.



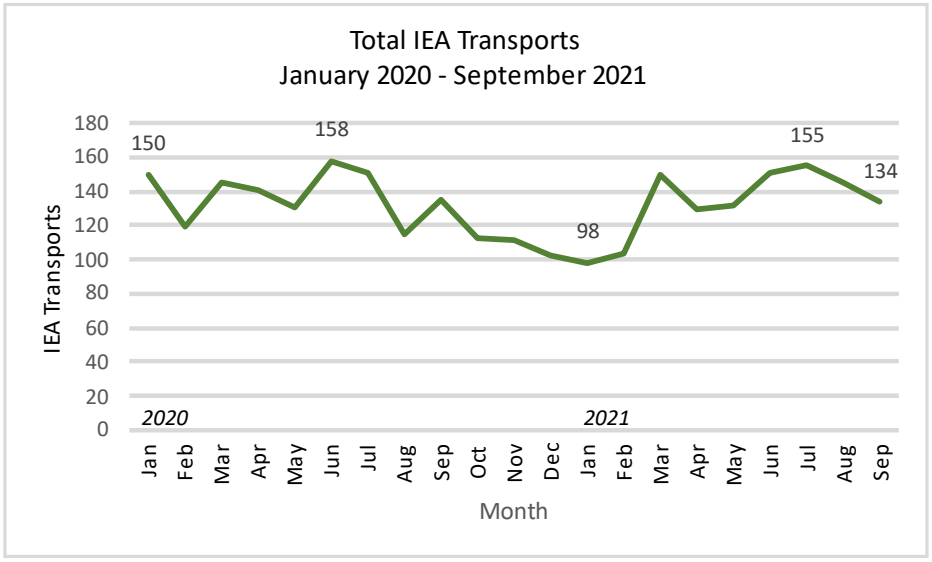


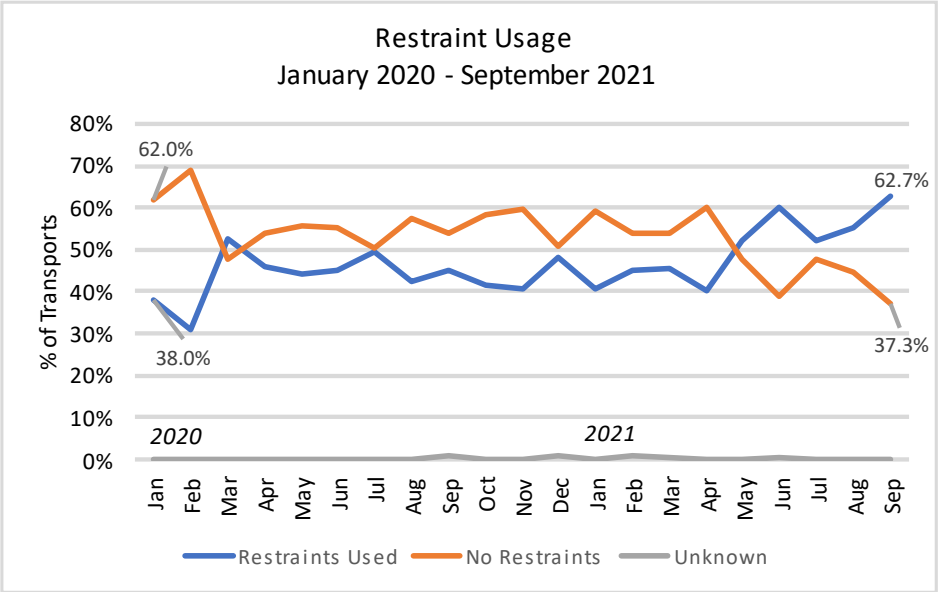
Comparison of Year 1 and Year 2 Transport Data:

The table to the right provides a comparison of selected metrics between Year 1 and Year 2. Age group and mode of transport are similar, but there is a marked increase in overall restraint usage, particularly with law enforcement.

Comparison of Year 1 and Year 2 Transports		
Metric	**Year 1** *(9 Months)*	**Year 2** *(12 Months)*
Total IEA Transports	1,245	1,525
Avg. Transports/Month	138	127
% Adults	95.8%	94.9%
% Children	4.2%	5.1%
% Law Enforcement	59.3%	58.5%
% Ambulance	39.7%	40.7%
% Other	1.0%	0.6%
% Using Restraints Overall	44.2%	49.6%
% Law Enf. Using Restraints	72.9%	84.2%
% Ambulance Using Restraints	1.4%	0.2%

The charts below display patterns over time for total IEA transports and restraint usage. "Restraint Usage January 2020 – September 2021", shows the percentage of transports with and without restraints since the beginning of data collection efforts. In general, the percentage of transports without restraint were greater than those with restraint, but this pattern reverses beginning in May 2021.





Appendix

Transport and Restraint Details for October 2020 – September 2021
