COMMITTEE: Judiciary

ANALYSIS

This bill provides that, with limited statutory exception, the state shall not restrict or interfere with an individual's decision to terminate a pregnancy and establishes a private right of action for violation of the chapter.

Explanation: Matter added to current law appears in ***bold italics.***
Matter removed from current law appears [~~in brackets and struckthrough.~~]
Matter which is either (a) all new or (b) repealed and reenacted appears in regular type.

SB 181-FN - AS INTRODUCED

23-0770
05/04

STATE OF NEW HAMPSHIRE

In the Year of Our Lord Two Thousand Twenty Three

AN ACT relative to access to abortion care.

Be it Enacted by the Senate and House of Representatives in General Court convened:

1 New Chapter; Access to Abortion Care. Amend RSA by inserting after chapter 132-A the following new chapter:

CHAPTER 132-B

ACCESS TO ABORTION CARE

132-B:1 Access to Abortion Care.

I. It shall be the public policy of New Hampshire that, because it is vital to the equality and liberty of all individuals, the state shall not restrict or interfere with an individual's exercise of their private decision to terminate a pregnancy except as provided in RSA 329:43 through RSA 329:50 and RSA 132:32 through RSA 132:36.

II. Enforcement.

(a) An individual injured as a result of a violation of this chapter shall have a private right of action in superior court against the state for injunctive relief arising from the violation.

(b) In addition to any injunctive relief awarded, the court may award costs and reasonable attorney's fees to an injured person who prevails in an action brought under this chapter.

2 Effective Date. This act shall take effect upon its passage.

SB 181-FN- FISCAL NOTE
AS INTRODUCED

AN ACT relative to access to abortion care.

FISCAL IMPACT: **[X] State** **[ ] County** **[ ] Local** **[ ] None**

	Estimated Increase / (Decrease)			
STATE:	**FY 2023**	**FY 2024**	**FY 2025**	**FY 2026**
Appropriation	$0	$0	$0	$0
Revenue	$0	$0	$0	$0
Expenditures	$0	Indeterminable Increase	Indeterminable Increase	Indeterminable Increase
Funding Source:	[X] General	[ ] Education	[ ] Highway	[ ] Other

METHODOLOGY:

This bill provides that, with limited statutory exception, the state shall not restrict or interfere with an individual's decision to terminate a pregnancy and establishes a private right of action for violation of the chapter.

The Judicial Branch indicates the fiscal impact on the Branch is indeterminable. The bill would create a new chapter, RSA 132-B, which would prohibit the State from restricting or interfering with an individual's decision to terminate a pregnancy except as otherwise provided in statute. The bill would authorize a new civil cause of action in Superior Court for an individual who is injured or to seek an injunction as a result of a violation of RSA 132-B. The Branch assumes this would result in an increase in the number of cases filed in Superior Court, but it is unable to determine how many additional cases would be filed.

Who supports the bill: In total 1,454 individuals signed in, in support of SB 181-FN. The full sign in sheets are available upon request to the Legislative Aide, Matthew Schelzi.

Who opposes the bill: In total, 433 individuals signed in, in opposition to SB 181-FN. The full sign in sheets are available upon request to the Legislative Aide, Matthew Schelzi.

Who is neutral on the bill: None.

Summary of testimony presented in support:

Senator Perkins Kwoka introduced SB 181-FN. She stated in 2021 she was a first term senator when abortion restrictions were enacted in the budget. Sen. Perkins Kwoka was 24 weeks pregnant when the Senate debated abortion restrictions. She referenced the Access to Abortion Care Act (2022) and the overturning of *Roe v. Wade*. Sen. Perkins Kwoka stated that 20 million people have lost access to abortion care in their home state. She stated that the New Hampshire Senate had bipartisan support but fell one vote short to pass legislation in 2022 to remove some restrictions on

abortion. She mentioned that some of her colleagues insisted upon waiting for the *Dobbs* decision before they acted themselves. Sen. Perkins Kwoka insisted the Legislature must act immediately to ensure protection for the women of New Hampshire. She stated that SB 181-FN is neither radical nor makes any changes to existing state law. This bill gives women protection to reproductive healthcare. Sen. Perkins Kwoka urged the Committee to support the bill.

Senator Gannon stated that New Hampshire is in the minority of states that allow abortions up to 24 weeks. He then stated that less than 10% of countries allow abortion after 24 weeks. Sen. Gannon noted that New Hampshire is in line with 43 other states. Sen. Gannon asked if Sen. Perkins Kwoka's bill would alter the time allotted for a woman to get an abortion and potentially allow for a woman to receive an abortion up until birth.

Sen. Perkins Kwoka stated that this bill clarifies under New Hampshire law that there is no right to interference by the state in abortion decisions prior to the ban that is already in place.

Sen. Gannon said he believes that lines 6 and 7 of SB 181-FN are open ended. He then asked if it could be interpreted as stating that someone could never interfere with women's reproductive rights leading up to birth.

Sen. Perkins Kwoka said that SB 181-FN states on line 8 that a women's right to reproductive healthcare is protected under law except where there has been previous legislation that affects it.

Sen. Gannon then asked about viability. He asked if this bill is looking to enshrine *Roe*, and if the Legislature should codify abortion access through this bill at 22 or 24 weeks.

Sen. Perkins Kwoka explained how *Roe v. Wade* was not a piece of legislation; it was a Supreme Court case. She emphasized that SB 181-FN is not about viability. This bill gives women protection to reproductive healthcare.

Senator Whitley said women were given these rights for fifty years and then they were taken away by the overturning of *Roe v. Wade*. Sen. Whitley asked if this bill attempts to give back the rights taken away by the Supreme Court.

Sen. Perkins Kwoka said the women of New Hampshire have the right to medical privacy and the right to an abortion. She said this bill would allow women protection to reproductive healthcare and would not allow for interference until 24 weeks.

Sen. Whitley asked if this bill gives women a private right of action.

Sen. Perkins Kwoka said this bill does exactly that. She explained that after the overturning of *Roe v. Wade*, women lost a right to private action. There is no statute to protect the privacy of women up to 24 weeks. Sen. Perkins Kwoka said SB 181-FN establishes and clarifies what women's reproductive rights are. She said this bill does not change New Hampshire state law.

Sen. Whitley stated that she heard individuals say that women did not lose rights after the *Dobbs* decision, but the decision is now up to state legislatures. She asked if this bill is giving the decision to the state legislators.

Sen. Perkins Kwoka said absolutely. She stated that 71% of her constituents support SB 181-FN and are looking for a clear statement of what their rights are.

Senator Abbas asked, if SB 181-FN became law, when would the enforcement provision be necessary.

Sen. Perkins Kwoka gave an example of how a pregnant woman, 24 weeks or less, could be allowed to claim for medical damages due to medical interference.

Sen. Abbas asked if a private medical facility interfered with a woman's healthcare, would the state then be liable.

Sen. Perkins Kwoka said that scenario would be interpreted as a state action.

Sen. Gannon stated that the majority of New Hampshire is against late term abortions. He then asked if Sen. Perkins Kwoka was against abortion after 22 or 24 weeks. Sen. Gannon expressed his trepidation of leaving viable babies behind.

Sen. Perkins Kwoka stated that nothing in SB 181-FN addressed the issue of viability.

Sen. Gannon asked if SB 181-FN would give protection up to 24 weeks.

Sen. Perkins Kwoka responded yes, that is what current state law is.

Sen. Whitley asked if viability is an individual medical determination.

Sen. Perkins Kwoka responded that she believed she has heard that.

Sen. Whitley asked if it is clear that the enforcement provision would be against state actions restricting abortions.

Sen. Perkins Kwoka said she agreed. She stated the language of the bill is clear in that it is prohibiting the state from restricting or interfering with an abortion decision.

Senator Carson said she is concerned about the enforcement provision. She described a hypothetical situation in which the doctor and the patient have a disagreement about how far along the patient is. Sen. Carson asked what Sen. Perkins Kwoka envisioned happening in that situation.

Sen. Perkins Kwoka said SB 181-FN makes it clear that up to week 24, with the best medical advice, the decision is between a doctor and patient.

Sen. Carson asked if SB 181-FN touches parental notification or if it stands by itself.

Sen. Perkins Kwoka said it stands by itself.

Sen. Abbas asked what a state interference would be if SB 181-FN became law.

Sen. Perkins Kwoka gave an example of a rule or regulation that prohibits medical personnel from performing a procedure that could be classified as an abortion prior to week 24.

Sen. Whitley said this statute doesn't provide action by private providers only state actors, is that correct.

Sen. Perkins Kwoka said there are a lot of details to think through. She expressed that SB 181-FN is designed to prevent the state from affecting a women's right to privacy when accessing medical care during the first 24 weeks of pregnancy.

Sen. Carson clarified that Sen. Perkins Kwoka would like to take the existing statute and place it into the *Roe v. Wade* statute. Sen. Carson asked for clarification on state action.

Sen. Perkins Kwoka said SB 181-FN states that the State of New Hampshire protects a woman's private medical decisions. She said this isn't a change to existing statue, but clarification of a right already in place.

Dr. Janet Perkins-Howland stated she is speaking as an OBGYN. She stated she supports the bill. She stated the principles of reproductive justice include the right to not have a child, have a child, and raise a child in a safe environment. She said all those rights are incredibly important, and said we need to support both decisions of when to have a child and when not to have a child. She noted her mission is to inform women about when is the best time to have a child and when is not. She asked the Committee to pass SB 181-FN but urged the Committee to talk more about contraceptive care.

Sen. Gannon asked if the outcome of reproductive justice impacts minority individuals more.

Dr. Perkins-Howland said we should focus more on contraceptive care; and said we are having the wrong conversation about abortion.

Senator Altschiller said she supports SB 181-FN. She said privacy protects the right of women to make bodily health choices. She said in November of 2018, 81% of New Hampshire voters added a right to privacy to the New Hampshire Constitution. She said unfortunately it doesn't apply to New Hampshire women who are pregnant. She said the loss of freedom and independence is reproductive servitude. Men and women should both be free in their reproductive decisions. She said New Hampshire men have not had the state government telling them what to do. Senator Altschiller urged the Committee to support SB 181-FN.

Sen. Abbas asked if Sen. Altschiller could provide an example of a state action that would incur the enforcement provisions of this bill.

Sen. Altschiller said that SB 181-FN puts in a positive right to abortion, and she is incredibly reticent to make up hypotheticals to justify Sen. Abbas' question, and she didn't want to engage in the hypothetical.

Sen. Gannon asked about viability and if she would be open to making 22-weeks the viability standard if he amended the bill.

Sen. Altschiller said his proposal would be an amendment to RSA 329:43 through RSA 329:50, and such an amendment wouldn't apply to this bill.

Representative Alexis Simpson said she supports SB 181-FN. She said since they introduced this bill last year, *Roe* is no longer the law of the land. Her constituents are scared and state after state have begun banning abortion early in pregnancy. She said Granite Staters are looking towards the Legislature to secure abortion access.

Sen. Carson said it was her understanding that a woman could have an abortion for any reason up to the 24th week, and asked Rep. Simpson if she can explain how that is confusing.

Rep. Simpson said the fear is about not having an abortion after 24 weeks, this law would put into statute the affirmative right to access to abortion in the first 24 weeks.

Sen. Carson said this bill is just restating a law in statute. She noted the confusion in how this bill was portrayed and how it was presented to the State of New Hampshire. She said the law was about a woman's right and it was distorted throughout the political process. Sen. Carson noted she is confused about the enforcement provision of SB 181-FN.

Rep. Simpson said people disagree on what is protected affirmatively. She noted all the other New England states protect the right to abortion care up until 24 weeks. She said it isn't clear in the law, so they want to put it into statute.

Sen. Carson said it was clearly stated that there is a 24-week period that a woman could get an abortion with no questions asked. She said she believed late term abortions were being stopped and that there are protections for health of the mother and for fatal fetal anomalies.

Rep. Simpson noted they disagree and said her constituents want their rights enumerated.

Sen. Whitley said RSA 329:43-50 specifically carves out the Fetal Protection Act. She asked where there is an affirmative protection to abortion.

Rep. Simpson said it's important to keep studying this issue.

Sen. Whitley said the bill doesn't address criminal penalties.

Rep. Simpson said that was correct.

Sen. Abbas asked if her constituents are confused by the 24-week standard, or the post 24 week standards.

Rep. Simpson said the post 24-week standard is clear. However, she stated abortion is not stated as an affirmative right in the first 24 weeks.

Sen. Whitley asked if her constituents confusion came after the *Dobbs* decision removed a woman's right to an abortion.

Rep. Simpson said that was correct.

Representative Amanda Toll stated she ran for office on a progressive feminist platform, so that anyone can make reproductive decisions. She is opposed to any bill that restricts abortion care. She supports SB 181-FN. In 2021, she said it was deeply

unpopular when the Legislature passed the budget that attacked reproductive rights. This bill would help women who need abortion care. She noted she had children when she was ready but not before that. Abortion care is an intersectional issue and she urged the Committee to support SB 181-FN.

Kelly Omu said she resides in Jaffrey. She said she supports SB 181-FN, as she has had an abortion. Her doctors told her there was no chance the fetus would make it full term. She was given the option to deliver her first child as a still born. The option they choose was an abortion but she was forced to travel to Boston for the abortion. She urged the Committee to pass SB 181-FN.

Josie Pinto, Executive Director of the Reproductive Freedom Fund of New Hampshire, strongly supported SB 181-FN. She said 70% of Granite Staters support abortion rights. She said abortion is a safe medical procedure, and abortion pills are safer than Tylenol. She noted SB 181-FN wouldn't change existing law but it would solidify it. She urged the Committee to vote in favor of this bill.

Emma Sevigny, Children's Behavioral Health Policy Director at New Futures, supports SB 181-FN. It would ensure access to critical care. Since *Roe* was overturned one-third of women of reproductive age across the country have already lost access to abortion care. SB 181-FN would enshrine the right to an abortion in state law. She noted this bill would increase access to these vital healthcare services for women and families. New Futures urged the Committee to support this bill.

Sen. Carson said the points she has made are not statistics for New Hampshire.

Ms. Sevigny said people do have the right to an abortion up to 24 weeks, and this law would clarify that it is an affirmative right to have an abortion.

Sen. Whitley asked if women in New Hampshire have a right to abortion up to 24 weeks or that there are no prohibitions up to 24 weeks.

Ms. Sevigny said the law is silent on the right to an abortion up to twenty-four weeks.

Elizabeth Canada, Advocacy Manager at Planned Parenthood, said this Committee passed HB 1609 (2022), which passed both chambers with broad bipartisan support. One in three women have lost access to abortion care. She stated more states are banning abortions so most people are traveling to New England. She said a hypothetical situation about enforcement could deal with a state trooper stopping a woman from going to get an abortion. A majority of Granite Staters want abortion free from government interference; two-thirds of Granite Staters want abortion access in state law. Abortion will remain safe and legal up to 24 weeks, as this law does not change any laws on the books. SB 181-FN would provide critical assurances that the state will not alter course. She urged the Committee to support SB 181-FN.

Sen. Abbas asked about extraterrestrial statutes, where people travel out of state to have an abortion and their home state is able to prosecute them.

Ms. Canada said states are attempting to pass those laws.

Sen. Abbas asked if there are any legal challenges pending.

Ms. Canada said she would have to check.

Sen. Gannon asked if this is more than feel good legislation.

Ms. Canada said there is no right to an abortion in the Fatal Fetal Anomaly Act so this bill establishes the right to an abortion. Since *Roe* was overturned it has caused a lot of confusion so people are looking to legislators to create a standard.

Sen. Whitley stated this bill isn't a feel-good law because it establishes a right.

Ms. Canada agreed.

Sen. Gannon asked what right was taken away.

Ms. Canada said there are no federal protections, and New Hampshire is the only state in New England that doesn't protect abortion.

Sen. Gannon said it is protected under RSA 329:32-34.

Ms. Canada said later in that statute it says there is no right to an abortion.

Sen. Whitley asked about, RSA 329:49, and asked if she thinks it doesn't create a right to abortion.

Ms. Canada said that is correct.

Sen. Carson said if the federal government decided to pass a law on abortion, then SB 181-FN would not be necessary.

Ms. Canada said there are no federal laws that protect abortion rights.

Courtney Reed, ACLU policy advocate, supported SB 181-FN. Post-*Dobbs* abortion is still legal in New Hampshire, however there are no protections in place for the right to have an abortion. Several states have banned abortion. 72% of Granite Staters are pro-choice. SB 181-FN will put into law that the state cannot further interfere in the right to access abortion. She urged the Committee to support this bill.

Sen. Abbas asked about if future legislation would be able to repeal this law.

Ms. Reed said this could be overturned in following sessions, but abortion care is popular.

Sen. Gannon asked if there is a point in fetal development that the child has life and liberty interests.

Ms. Reed said the ACLU avoids viability issues.

Devan Quinn, Director of Policy for the New Hampshire Woman's Foundation, said New Hampshire sticks out as the only state in New England that does not protect a woman's right. New Hampshire would be the last state in New England to codify abortion rights. She said when women have access to reproductive services it gives them more economic freedom.

Patricia Mullin supported SB 181-FN. She stated she believed women have the right to complete privacy to live their life. She said access to abortion must be readily available. She urged the Committee to vote Ought to Pass on SB 181-FN.

Representative Maria Perez shared her personal story and urged the Committee to support SB 181-FN.

Reverend Allison Palm, a Unitarian Universalist minister, passed out a letter with 30 interfaith groups supporting the bill. She said as people of faith, faith tells them to support bodily autonomy. Unitarian Universalism believes in the safe access to abortion and doesn't believe it's the place of state government to ban abortion. She said an affirmation is much better than feel good legislation and urged the Committee to pass SB 181-FN.

Summary of testimony presented in opposition:

Laura El-Azem said *Roe v. Wade* was decided wrongly. She said this bill is a radical step. She said a majority of Granite Staters want restrictions in the second half of a pregnancy. She urged the Committee to ITL this bill.

Bob Dunn, Director of Public Policy for the Diocese of Manchester, noted this is a Senate Bill that wants to be a CACR. He said the bill doesn't change anything substantially to the law, and that a subsequent Legislature could take a different action. He said there needs to be a recognition of human dignity in the womb.

Richard LaPlume stated he is pro-life and always will be. He asked what abortions have to do with women's health. He said he is testifying in defense of the unborn, and he is opposed to SB 181-FN.

Jason Hennessey, President of New Hampshire Right to Life, stated this bill is a virtue signal. He said he didn't hear any real-life examples that the enforcement mechanism would be needed for. He said the primary goal of government is to protect rights and that this bill doesn't do that. He said 70% of New Hampshire does agree with abortion restrictions at some point, but stated this bill would not accomplish that goal. He said he heard a statement about how other New England states have abortion rights, but he doesn't think that is a good reason to pass this law.

Caution! This message was sent from outside your organization.

What we have in America now is a confusing mix of arbitrary laws on abortion.
The citizens of New Hampshire deserve clarity. We also need to have our right to privacy and control over our own bodies to be protected.
Our own legislature is now considering whether to change all this.
I support SB 181 which will protect the rights of New Hampshire citizens.

Bill Kingston

Hello,
I believe a woman has the right to her body and choices she makes about it. How would you feel about your daughter being raped and not being able to make her own choice about the pregnancy?

Testimony January 31

Good afternoon, Committee Members,

My name is Patti Mullin, I am a resident of Sunapee, and I am here to SUPPORT SB 181, the Access to Abortion-care Act. Access to abortion is essential, and my abortion saved my life.

My mother had four daughters, my sister Deirdre, eighteen months later I arrived, seven years later came the twins. My father was an abuser and a traveling salesman. Three months after the twins were born my mother discovered my father had two other wives. The next few years found us on welfare, living in the projects, and once homeless.

Mom remarried when I was eleven. A NYC fireman with a shield.
Not a badge, in NYC it's a shield. I do not say his name, I call him The Evil One. The Evil One bought a nice home and moved the five of us in. The four of us spent the rest of our childhoods being raped, beaten, emotionally, mentally, and spiritually tortured. We would call the police, but he had a shield.

My sister, Deirdre, died from suicide this past July. My Irish twin.
She was a brilliant woman, graduated from Fordham with her MSW and a 4.0 average after raising three brilliant children.
Deirdre started having memory issues at sixty-two. It turned out Deirdre had multiple traumatic brain injuries; the dementia was rapid. She hated losing her mind. The Evil One used to grab us by our hair and bang our heads against the walls or the floor. If we were on the floor, he would kick us with his steel toed boots. I had a baseline MRI to check my brain. Deirdre died from the beatings.

My sister tried to protect us. She saved my life when I was sixteen. My period was two weeks late, I was terrified. I was always terrified. I told Deirdre and she took me for a urine test. By now I was three weeks late. I found out I was pregnant at 8 weeks. Her first words to me were, "Jesus Christ Patti if he finds out you are pregnant, he's going to beat you to death!" I knew this was literally the truth. We scheduled an abortion;

it would be two weeks. Those two weeks were the longest weeks of my life. By the time I had my abortion, I was 10 weeks pregnant.

Everyone in the world has their own personal reason to choose abortion. My reason was abject fear of being beaten to death. The freedom to choose saved me. One of my therapists once told me that in thirty years of practice my childhood was the worst she ever heard. I am here today, speaking to you, only because I had access to an abortion. If you think I am overly dramatic for any reason, just think of my sister who died from multiple traumatic brain injuries.

I have a daughter now. A beautiful, educated, kind and generous young woman. I cannot fathom why she should be denied access to the reproductive health care that saved my life.

I knew what was best for me at sixteen. No one was protecting me. The choice I made was the first time in my sixteen years I was able to protect myself. Access to abortion must be available to all. Each of our lives and circumstances are different, but no matter our reason, each of us must have access to abortion personally behind closed doors, free from government intrusion and interference No one else knows our stories, none of you knew me or what was best for my life.

Reproductive Rights saved my life. Abortion saved my life. And that's why our state needs to take a clear stand in protecting abortion rights for Granite Staters.

Please vote "Ought to Pass" on SB 181.

Matthew Schelzi

Caution! This message was sent from outside your organization.

The Access to Abortion-care Act would enshrine abortion rights in state law, without changing any current abortion laws.
I have followed and championed women's right to bodily autonomy since long before the Roe v. Wade decision came down and am highly disturbed to see the roll back of this right around our country. Please support this bill!!

Good afternoon,

I am a New Hampshire resident that relocated from Georgia in October 2021, and I would like to express my support for SB-181 and share my story with you.

In 2012, I met a very special guy after connecting online over a shared love for an obscure band. It was the first significant relationship for either of us and pretty early on, we knew we were in it for the long haul. After a year of dating, Charles and I bought a house and moved in together. We were 27, in love, and had our entire lives ahead of us... until we didn't. You see, Charles' mom, Barbara, had been battling a mysterious illness for years that no doctor seemed able to correctly diagnose. Our first Christmas in our home, we hosted our families and Charles' father came with grave news that they had finally learned why Barbara was so sick. She had Huntington's disease. Huntington's is often described as having ALS, Parkinson's, and Alzheimer's simultaneously. There is no cure and no meaningful treatment options. Not only is Huntington's a fatal disease, but it is genetic and Charles had a 50% chance of inheriting it. We were devastated and Charles felt strongly that he wanted to know his gene status before making any decisions about our future together. Six months later, we got the news that Charles had the gene. Given his mother's history, we could guess that Charles had about fifteen healthy years ahead of him before showing symptoms.

The following year, we were married. Soon after, we knew we wanted to start our family, but we had no idea where to start with Huntington's disease in the equation. Resolved in the decision that we would not pass this gene to the next generation, we began researching. Discovering that IVF with genetic testing was an option, we met with multiple fertility specialists. Each one said the same thing. I was a poor candidate for IVF, we were unlikely to have success, and it could cost us $50k with no guarantee. Despite being a poor candidate for IVF, my test results showed that I could probably become pregnant naturally without much difficulty. We learned that with chorionic villus sampling (CVS), we could find out around 14 weeks gestation the gene status of the fetus, and terminate the pregnancy by 16 weeks. This seemed like our only option, and we took it. Within three months, I became pregnant. Knowing that termination was an option, I tried to stay disconnected from my pregnancy, but I couldn't help myself. I loved the idea of this baby. It brought me so much peace to know that even after Charles was gone, I would have a piece of him with me. I white-knuckled the passing weeks until I was far enough along for the CVS test. It was a quick and painless procedure, and we would have results in just a few weeks. That evening, following the test, my water broke (a 0.5% chance of occurring after a CVS test). We found ourselves in the emergency room where doctors were telling me that nothing could be done. I was going to continue to leak amniotic fluid until there was none left, at which point, the fetus would no longer be viable. And not only this, but I was at a severe risk of infection and needed to follow-up with my doctor immediately the next day. Devastated cannot begin to describe the emotional agony I felt. The next day, my doctor confirmed everything I'd learned in the ER. She advised me that I needed to have a d&c as soon as possible or risk infection. There was one caveat to "as soon as possible." I lived in Georgia, and in Georgia, you are required to have a minimum 24 hour waiting period from the time of deciding to have a d&c, to the actual time of the procedure. It didn't matter that my doctor was

concerned about my health and future fertility, or that the fetus had 0% chance of surviving this. The next day, I had my first abortion at Emory Hospital in Atlanta. I was given anesthesia, and kind nurses held me as I wept.
Resolved that we wanted to grow our family, but unable to face another abortion, we turned to new options. Next, we went down the path of using donor sperm. Six months and thousands of dollars later, all we had to show for it was one devastating chemical pregnancy.

Next, we went down the path of adoption. After another six months, we matched with a birth mother and were over the moon that this was finally our time, after so much loss. For the last several months of her pregnancy, we really connected with the mother, financially and emotionally supported her, and dropped everything when we got the call that she was ready to deliver. The birth of that baby boy was nothing short of amazing. She allowed us to be in the room, and even let Charles cut the cord. We named him Avery, and sent out photos of our son to our families. She asked for a moment alone with him. We never saw him again.

Despite losing $40k on our failed adoption and being emotionally drained, we knew this wasn't the end of our dream to start a family. We came full circle and found ourselves facing a familiar path- a natural pregnancy with the chance of termination. I fell pregnant pretty quickly and even after years of continuous loss, I was hopeful. I faced the trauma of my first CVS test, and underwent it once more. It was successful this time. However, the test results showed that the baby had inherited Huntington's disease. I knew what I had to do. This was my choice alone. I knew that I could not knowingly sentence a person to such a fate, and that the right choice was to terminate. I went back to Emory Hospital, where I was once again met with a compassionate and kind medical team that supported me as I mourned yet another loss.

Never giving up, we began to explore donor embryos. It was more affordable and much more likely to be successful than IVF. It was a perfect blend of every path we'd tried before, and there would be no CVS test to face down the line. Leaving the appointment with the new fertility doctor, our hope was restored. A week later, I learned I had become naturally pregnant. We hadn't taken steps to prevent a pregnancy, but I was nowhere near ready to face another CVS test. Lying in the exam room during my first ultrasound, the technician became very quiet. Then, all of a sudden, the biggest smile came over her face. Being that we were in the office of a fertility specialist, this news would typically be celebrated, but we weren't the typical patients at an IVF clinic. The technician enormously congratulated us because there were two babies on the screen. We were having twins. This had never come up in my research. Our heads were spinning and the trauma of the last 3 years boiled over. I sobbed with my entire body in that exam room. After getting a handle on the situation, we learned that it was possible to test each baby individually. I faced another, and more risky, CVS test. Weeks later, the test results showed that they were fraternal twins. One had inherited Huntington's, the other had not. I made the choice to terminate the HD positive twin.

A little over five months later, my son was born. I am reminded daily of the loss of his twin, and every pregnancy before that. Each day, Charles wakes up knowing that he is one day closer to showing symptoms, and today, we have a healthy son and daughter, who will never fear Huntington's for themselves. I cannot control what Huntington's will do to the person I have built my life with, but I can ensure that Huntington's stops with him. I would face every single loss all over again to keep it that way. I am not a special case. My story is not unique. My circumstances are not exceptional. I am just one of many people that have had to face an abortion to do the right thing. Every single person is deserving of the dignity and exceptional healthcare I have received along the way.

Thank you,
Jessica King

Caution! This message was sent from outside your organization.

We need to protect the right to safe, legal abortions for women and their families in the Granite State. While no one wants to have an abortion, removing the choice eliminates financial control and life liberties for the people of NH. Our state needs policy that supports families in determining their future, allows parents to be part of the workforce as they wish, not as politicians decide. In a state that struggles with child care capacity, struggles to attract young residents, and struggles to support people who need public subsidies, eliminating or restricting the choice to have a child hinders our ability to thrive.

Let's put this issue to rest in the Granite State and ensure access to safe, legal abortions for our populace. Don't push our State back decades, economic progress and stability includes progress and choice for women.

Sincerely,

Andrea Muller

Jefferson, NH resident and ardently pro-choice.

Dear Legislators,
The debate over abortion healthcare access has shifted to state courts and legislatures after last year's seismic Supreme Court decision to overturn Roe v. Wade. Without federal constitutional protection of abortion rights under Roe, the future of access to care in New Hampshire is at risk. Overturning Roe v. Wade has interrupted the doctor-patient relationship. Can we be truly free if the doctor cannot take care of all her healthcare needs? Depending on the state where they practice, will physicians need legal advice before they treat a woman having a miscarriage?
Republicans in Congress continue to push for a national abortion ban, to criminalize doctors and nurses, and to make contraceptives harder to access.
Support SB 181, relative to reproductive rights, access to abortion care act.
Thank you for your time,
Sincerely,
Sylvia R. Kennedy, MD

Dear Senate Judiciary Committee Members:

I support SB 181 for the sake of all women in the state who may need an abortion for any reason.

My reason was rape while I was in college 36 years ago. The rape left me pregnant and unable to cope with my situation physically, emotionally, and financially. I posted my story via Instagram and FB when Roe v. Wade was overturned. I share those text graphics with you below.

Thank you for your time, effort, and consideration of women's true medical needs—namely to be permitted to make whatever decisions she needs to make with the help of qualified medical personnel... *not* politicians.

Sincerely,
Dana Myskowski
Warner, NH

I had an
abortion.

A college girlfriend helped me.
She loaned me the $500.
She gave me a bed to sleep in.
She took me to the Planned Parenthood clinic.
She held my elbow as we crossed a picket line where an angry white privileged male shouted in my face, his spit coating my cheeks; his words stung my heart & ears.

Afterwards, we met my friend's sister for ice cream.
As if it was perfectly natural what just happened.
It wasn't natural, but it was legal.
The nurses had been gentle, caring, professional. The doctor a bit less so, but he had to cross that picket line daily. So, no ill will. Except, I wish he hadn't said,
"oh look--twins!"

It would take a decade before I could speak of my experience. But when I did open up, I took my story to the campus where it happened. With the help of counselors there, I told my story to new students, frat brothers & sorority sisters. Later, I captured my story in a short screenplay, that was chosen to be filmed and later screened at UMASS Amherst. I thought I was done.

Yet, here I am again. Speaking up. On behalf of all the young women who may follow me. Because while the Supreme Court InJustices may take away Abortion rights, they have done nothing to curb the rate of rapes. Instead, if they go through with this decision--and our Congresspeople & Senators do nothing to stop this--they will be sentencing women to death.

Because that is what back-alley abortions too often have led to. On behalf of all women who have chosen like me to have an abortion, and on behalf of women like my mom who chose not to during the illegal time when her own father encouraged it while she was pregnant with me, please lift your voice to protect women's rights. #IHadAnAbortion

While abortion is legal in New Hampshire, up to 24 weeks, after the Supreme Court *Dobbs* decision, it's up to every state to determine the future of abortion rights. New Hampshire is the **only state in New England** that has not protected the right to abortion in state law. We have the chance to change that with the "Access to Abortion-Care Act" (HB 88 & SB 181). Please support SB 181.

Hello everyone, I'm Morgan, I am a resident of Concord, and am writing to express my SUPPORT for SB 181.

Everyone deserves access to the care they need, when they need it. Everyone deserves control over their life, their body, and their story.

Today, I want to share my story.

I took my first two pregnancy tests during a lunch break from work, with the initial hope that it was simply a pregnancy scare - which is always anxiety-inducing, but nothing out of the ordinary. I hoped that the tests would give me some peace of mind until my period arrived.

Then, the accusatory double lines on the first test - and the same on the second, taken only minutes later as I furiously googled "false positive pregnancy tests" and hoped beyond hope that it was a fluke.

It wasn't.

I went back to work to finish out the day with the irrevocable knowledge that a process had begun within me, gathering momentum. That regardless of my feelings on the matter it would continue, slowly, till the point of no return if it remained unchecked. Just the passing of time became frightening as, cell by cell, something grew within me, every day my body approaching a biological finish line I had no intention of crossing.

I was young, having just graduated college the year before and working at my alma mater through a fellowship. I was making minimum wage, living on campus, and had no clue what my next step would be after the fellowship ended in nine months. It was never a question of what my choice would be in this situation.

I made my appointment at Planned Parenthood to confirm my pregnancy as quickly as possible. At this point I was six weeks along. And then I made an appointment for the abortion - it had to be two weeks out.

This was an eternity to me. Just the physical experience of being pregnant was horrifying. My body was not my own. It was sore, tired, sick. I spent most mornings puking as quietly as I could in the small shared staff bathroom at work. While a wanted pregnancy can be a magical thing, this experience truly showed me that no one should be pregnant if they don't want to be. It was a complete and total loss of control. My body felt like it was at odds with me, tormenting me. The pregnancy and it's consequences were all-consuming. I felt terrible, I performed terribly at work, and I didnt see most, if any, of my friends.

I had a medication abortion. I took one pill at the clinic, and one later that night. I woke up the next morning lighter. The sense of momentum had calmed and my body was still. The future did not fill me with dread any longer - time stretched forward freely.

I can say with complete confidence that I would not have the life I do today if I had not had access to abortion. I found a career path I am passionate about, a job I love, and am currently enrolled in a dual degree masters program. Pure and simple, my abortion gave me my life back. I was able to write my own story the way I wanted. And that's what we are fighting for: for the right of people everywhere to control the trajectory of their lives. That's what I want to protect. That's what Senate Bill 181 would protect.

This bill would enshrine abortion rights into state law which is critical because the Supreme Court overturned *Roe v. Wade* and gave state politicians control over the future of abortion rights. Granite Staters believe abortion should be safe and legal and we need lawmakers to act now to protect our right to make personal, private health care decisions. You, as lawmakers, have the awesome power and responsibility to protect the future of our rights.

Please vote "Ought to Pass" on SB 181 and protect abortion access for Granite Staters.

Honorable Committee Members,

I am writing to ask you to please vote NO (ITL) on SB 181 which would prohibit any additional restrictions to NH's Fetal Life Protection Act.

I am a widow and the mom of two adult sons with Duchenne Muscular Dystrophy which is 100% fatal with no treatment or cure (please see attached photo of our family).

Ben and Sam have been a blessing to our family, to their classmates, co-workers, our town, church family and our neighbors and community in general. The fact that the Fetal Life Protection Act allows for a fatal fetal anomaly means that Ben and Sam could have been aborted, I believe up until birth.

Until you have a family member or close friend with a disability, you have no idea how precious and sacred life really is.

I would like to see the fatal fetal anomaly exception repealed and to take the current abortion ban down to a more moderate 12 or 15 weeks.

Please vote ITL on SB 181.

Thanks so much for your time,

Lori Safford
Pelham, NH

Caution! This message was sent from outside your organization.

Dear Senate Judiciary Committee Members,

I am writing to urge you to support SB 181, and include my testimony in the public record.

I am a Pediatric Emergency Medicine physician. My adult life has been dedicated to saving children's lives. But I could not save my own daughters.

I had 2 abortions. My story is of my love and my heartbreak. But the value is in my body and my choices.

This was my first pregnancy, and very much wanted by my husband and I. We were shocked and thrilled when our first scan at 12 weeks showed 2 babies.

However, the ultrasound also showed I had a uterine anomaly – a potentially life-threatening condition. The twins were in 2 different areas of my uterus.

More studies showed I was safe, and we would have our baby girls. We chose names. I marked the date on my calendar when they would be 29 weeks and very likely to survive.

At 16 weeks and 4 days pregnant, I woke up with pain. It became sharp, severe. It hurt to breathe.

I was ultimately sent to a Boston hospital. My husband and I sat in a dark room where monitors show the ultrasound images - turned on during happy scans, turned off during the sad ones. They were off for ours.

The news was worse than we could imagine. The left side was a rudimentary horn, and the uterine wall had ruptured in 2 places. This fetus had no chance. My womb was literally broken. On the right side, the baby had a congenital heart defect which would require surgery and functioning lungs to survive. If she could make it to viability in my broken womb.

These findings changed everything. To save my life, I needed surgery, and one of my daughters inside, needed to be removed.

I had so many questions for my girls. The doctor held my gaze. "You are thinking like a mother, doing anything for her child, but we need to keep you alive."

At the time I didn't understand, I couldn't hold my babies in my arms, how am I a mother yet? We are talking about how they will die, they haven't even been born, how am I a mother already?

Soon after, I understood. In my grief, in all of my love, so much of my heart is theirs. That's how I am a mother, even without them in my arms.

In surgery, they saved the unicornuate uterus, and the fetus on the right was still there. But it was clear that allowing the pregnancy to continue would put me at a huge risk.

I could still lose my uterus or die. But without an abortion, those risks were much, much higher.

For two weeks, I sat on the couch, tried to heal from surgery, and I loved my baby as hard as I could. I grieved.

We went to Boston for our appointment the day before the D&C, the abortion. We were there for medical care. We were there to save my life. We were there because this was the most appropriate decision for **our** family. We were there because we needed to be there.

They saved half my uterus. I would be fine. I tried to grieve and landed in anger so, so often. And then awe. It still amazes me that medical services, technology, and skill were able to save my life.

Nearly 50 years prior, there were laws in states across this country that would not have protected me OR my babies. With the overturning of *Roe v. Wade*, women across the country now face the fear and reality of those medical uncertainties again.

My abortions saved my life. My abortions allowed me to have more children. My abortions allowed me to continue my work - to save your children's lives.

I appreciate that the legislature acted last year to add a fatal fetal diagnosis exception to the NH abortion ban. However, we also need to enshrine access to safe and legal abortion into NH state law. As a doctor and as a patient, I understand just how different every pregnancy is. Granite Staters and their medical providers need all options available to them.

Please act now, support SB 181, and protect the right for people to make decisions about their own bodies. Protect access to safe and legal abortion.

Sincerely,

Emily A. Zajano, MD

Dear Senate Judiciary Committee members,

As I am unable to be present tomorrow due to clinical responsibilities, I would like to submit the following written testimony on behalf of myself as a New Hampshire resident.

As a physician in the reproductive health care space, I have the privilege of caring for patients in New Hampshire in some of the most vulnerable moments of their lives. Our state has enjoyed a long bipartisan tradition of upholding privacy when it comes to personal medical decisions; access to critically important health care services including safe and legal abortion should be no exception. Denying access to safe, and often critically necessary medical options, is a dangerous path that can have far-reaching effects that we are now seeing nationally in other parts of the country. 66 percent of Granite Staters believe that abortion should be legal in all or most cases. Unfortunately, current legislative leadership in Concord has proven hostile to reproductive rights, posing the greatest threat to safe, legal abortion in decades. That is why it is critical New Hampshire takes action now to safeguard abortion access. Please give your support to permanently protecting the freedom to offer all safe and evidence-based reproductive medical options to Granite Staters.

Sincerely,
Maris K. Toland

Hello Senators of the Judiciary committee! Thank you for your volunteer hours spent keeping NH going!

I won't be able to attend your hearing tomorrow so I wanted to email my testimony to you directly. One of my favorite things about the state of New Hampshire is the commitment to freedom, even stated in our motto. However, we know that freedom without protection invites manipulation and control. Having SB181 signed into law would protect our freedom and autonomy over our bodies at a critical time when that freedom is under attack.

One of the choices I have made with my bodily autonomy is to remain child free by choice. Not having children frees me up to follow my passion for travel, and helps me work towards my financial goals of owning a house and getting a dog. I'm still committed to helping to raise the next generation in New Hampshire and currently work as a therapist at a high school. Not having children of my own allows me the time and capacity to help the children in my community thrive. Having access to abortion is what has allowed me to make this choice.

Although there are several other bills this session that would seek to limit abortion access, the procedure itself is readily accessible. We have local, state, national, and even international organizations that dedicate their resources to assisting people in accessing abortions. Whether or not our legislators support access to abortion, the people have made these abortions accessible to themselves. Signing SB181 into law would be a historic act of solidarity with the people of New Hampshire and open doors for future legislation to continue to protect and support the accessibility of abortions for our people.

Thank you!

Hello Honorable Commitee Members,

Please Vote NO (ITL) on SB 181!

I am a 27-year-old young man named Benjamin Safford from Pelham, NH. I have Duchenne muscular dystrophy and use a power wheelchair. I have a meaningful life: I graduated from Gordon College with a bachelor's degree in Social Work, I work for a non-profit, and I lead a men's Bible Study for my church. Many disabled individuals lose an opportunity to live meaningful lives because they are aborted before the 24th week of life in the womb. I am an example of someone with a chronic condition and fetal fatal anomaly living a meaningful life. Please allow others to have the same.

Thank you,
Benjamin Safford

Committee members,

Termination of pregnancy should be restricted through the law. As a current woman in my 34th week of pregnancy, my daughter is kicking, moving, and a viable life. If seen outside my womb, termination of her life would be murder. She's been felt kicking and moving since our 13th week ultrasound, and heard a heartbeat at 8 week ultrasound. Mothers have a legal, and moral duty to protect their children, most especially those within the womb. The law must protect these babies which includes intervening in elective abortions in pregnancy. Passing this bill sets a dangerous president for the future of New Hampshire and its children.
I oppose SB181 and highly urge you to consider what occurs to the baby when the person who ought to love and nurture their own above everyone else is given free reign to exercise their will over nature and reason. It murders the baby, destroys the mother, and leads to the destruction of society.

To Senate Judiciary Committee

SB 181

The New Hampshire Legislature will have the opportunity to show their constituents that they support people's freedom to make their own private medical decisions which include abortion access. The Access to Abortion Care Act would put abortion rights into statute in New Hampshire. If passed into law, abortion will remain safe, legal, and accessible in the Granite State.

SB 181 upholds long-held New Hampshire values by putting into law that the state cannot further interfere in the right to access abortion. This bill does not change any current New Hampshire abortion laws; it does however, provide critical protections to ensure that Granite State women and families can work with their doctors to get the healthcare they need.

Poll after poll has shown that access to safe, legal abortion is popular and support is at the highest it's been in 2 decades, with 66 percent of Granite Staters agreeing that abortion should be available in New Hampshire.

The American College of Obstetricians and Gynecologists states that access to the full spectrum of medical care, including abortion is essential to people's health, safety and well-being. Physicians must be able to provide medical care to people without outside interference.

The science of medicine is not subjective and a strongly held personal belief should never outweigh scientific evidence, override standards of medical care or drive policy that puts a person's health or life at risk.

I ask that you support SB 181 to keep abortion access safe in New Hampshire. I request that this written testimony be submitted to the public record.

Thank you

Ellen M Joyce, MD, FACOG

Assistant Professor Dartmouth's Geisel School of Medicine

Subject: SB181

Dear Members of the Senate Judiciary Committee, For the Supreme Court to throw back abortion rights to the states was done with apparent ignorance of our Constitution's wisdom that certain fundamental rights should not be decided by the states, and therefore the ever-shifting tides of partisanship. Roe v. Wade established a national policy. For the Supreme Court to say the matter should be determined by each state has created the present chaos, not the stability of a wise national policy.

To approve SB181 would form a basic foundation that would help stabilize these every-shifting partisan tides and hostilities.

Our legislators also are our representatives. Citizen polls consistently indicate support for a woman's right to determine a decision essential to her health, her life, as well as the life and health of a child born to a mother unable to provide love and nourishing essential to a good life.

Raising a child has challenges that most men do not know. As does a nine-month pregnancy, especially in a country that has one of the poorest health records for pregnancy and birth of all the "developed" countries.

I could go on.

Respectfully, please support SB 181

Frances Von Mertens

Subject: Pass SB181

Caution! This message was sent from outside your organization.

I am a firm believer in the rights of all people to control their own bodies and health treatments. Unfortunately, our Supreme Court has put that right into jeopardy. We must approve this bill to protect that right for all women in NH to control what happens to their own bodies!

Abortion bans disproportionately impact people with fewer financial resources. So the people most affected are those that already have fewer resources to be able to raise another child that they have decided they don't want. These children are the most likely to need further social services and financial help throughout their lives.

DO NOT MAKE THEM HAVE CHILDREN THEY DON'T WANT!!!

This abortion ban is deeply unpopular with Granite Staters. Only one-third of Granite Staters support the abortion ban. Two-thirds of Granite Staters believe that abortion should be legal in all or most cases.

SB181 puts the right to have an abortion into state law, adding a layer of protection and providing critical assurances to Granite Staters. It does not change any current New Hampshire abortion laws.

PLEASE PASS SB181!!!

Thank you!

Hi Matthew,

Please forward my email to the Judiciary Committee members.

To New Hampshire Senate Judiciary Committee members,

I implore you to support the passage of SB181. With the overturning of Roe, which provided a constitutional right to women in this country for almost a half century, SCOTUS made the point that it is a state's rights issue. Therefore, we have to do everything we can to codify the right to reproductive care in New Hampshire. The Granite State is the only New England state that does not have this right enshrined in our state laws, and without a law to protect this right, it will always be under attack by a minority, extremist group within the NH legislature.

For generations, *Roe* has had bipartisan support. Poll after poll has shown that access to safe, legal abortion is popular, and support is at the highest it's been in two decades with 7 in ten Americans opposed to overturning *Roe v. Wade.*

Furthermore, polling shows that NH's recently-signed abortion ban is deeply unpopular with Granite Staters. Our state has enjoyed a long bipartisan tradition of upholding privacy when it comes to personal medical decisions. In the 2022 legislative session, this bill had bipartisan support in the Senate. I call on this Legislature to show their constituents they support *Roe* and support people's freedom to make their own private medical decisions, which includes abortion.

Kind Regards,

Cybele Grier
Rye, NH

Dear NH Legislators:

I am writing in support of SB 181. Please consider these comments.

I feel very strongly that we need to keep it possible for females in NH to access reproductive medical care as they deem best, in consultation with their medical providers and any loved ones who are involved. A bumper sticker I once saw sums it up best: "If *you* don't believe in abortion, don't have one." Those of us who supported Roe v. Wade have never taken that choice away from anyone- please don't deprive women of making their own choices.

Furthermore, I think it's not often enough said that those of us who advocate for reproductive rights don't *love* the idea of abortion! In a perfect world, no woman or child would ever be assaulted, sex would always be consensual, and all teens would have comprehensive sex education and access to birth control such that unwanted pregnancies could be vastly reduced. But this is not a perfect world.

Whatever the law is, there should be a clear, solid exception for rape and/or incest. Ask yourselves: "Would *you* require *your* twelve year old daughter or granddaughter to bear the child of her rapist?" And although some advocate for an exception up to a certain cut-off time if the rape or incest has been reported, you should realize that in many cases, particularly in the case of a child, there is so much fear and stigma that these situations are not reported at an early stage.

I believe that in some circumstances abortion can actually be a "pro-life" choice for the mother, the family, and possibly the future human being who might otherwise be born with insurmountable health issues or raised in an adverse situation as an unwanted child. (Follow the biography of the Parkland High shooter, for example.) There is also much to say about how adoption is not always the answer either. There is a study which hypothesizes that a major drop in crime in the US between 1991 and 2014 may be attributable to the availability of legalized abortion. (See Stanford Law publication of John J Donahue III and Steven D. Levitt.)

Please do not let New Hampshire become a place in which women cannot make the best choice for themselves and their families. If you are *truly pro-life,* you could also work for parental leave legislation, healthcare for all, a liveable wage, sensible gun legislation, childcare subsidies, state education funding at least for all students who need special services (so that they do not become resented by the over-burdened

property tax payers when their families move in and out of towns), and environmental policies which will save our earth for the future generations. All of these actions could do far more for improving lives, for being *pro life,* than banning abortion will ever do.

Thank you for considering these points when working on NH laws related to this issue.

Sincerely,
Anne Onion

Dear Committee Members,

I am a Mother/Baby Doctor and a Doctor of Family Medicine (DO) caring for women in New Hampshire for last 23 years. I teach residents and medical students maternity care, obstetrics, and neonatal care. It has never been more critical to act to protect the reproductive health care rights of the women of our state than right now.

The Access to Abortion-care Act (AAA), House Bill 88 and SB 181 provides critical assurances to Granite State patients and families that they can work with their doctors, including myself and my residents, to get the health care they need in the majority of situations.

I am most concerned that New Hampshire remains the only state in New England without protections in state law for abortion access. The health care landscape in this country has been upended. Many healthcare institutions are already understaffed and healthcare workers of all disciplines are burned out, leaving the healthcare environment for higher pay, work from home and less litigious sources of employment. The potential loss of access to abortion will create even more chaos and confusion as it has for those 20 million Americans (1 in 3) who have have lost access to abortion in their home state, since June 2022 when the Supreme Court overturned *Roe vs Wade*.

I stand along side a broad coalition of health care advocates and organizations who have signed on in support of the Access to Abortion-care Act, because we know its passage will protect access to safe, legal abortion in New Hampshire.

Dear Senate Judiciary Committee members,

First off, thank you for serving the people of New Hampshire. I am a resident of Newmarket NH and **I am reaching out to declare my support of SB 181 in solidarity with the 14 legislators who sponsor this piece of legislation.** As a young woman this bill directly affects me and hundreds of thousands of others across the state of New Hampshire. Please help protect my reproductive freedom and access to reproductive healthcare by passing the Access to Abortion-care Act. In not doing so, the state is deliberately putting the lives of many women and children at risk, and showing the world that we do not value privacy or freedom. The government does not belong in the gynecologist's office!

New Hampshire must make it clear to its citizens and the nation that it is a state that values privacy, freedom, and individual decision-making by passing the Access to Abortion-care Act.

Thank you for your time, consideration of a constituent's input, and again, for your service to the people of New Hampshire.

Sincerely,

Mikayla Humiston

The Honorable Sharon Carson January 31 st , 2023
Chair, Judiciary Committee
Concord, NH 03301

Testimony in OPPOSITION of SB 181

Good morning Chair and Members of the Judiciary Committee,

For the record, my name is Ethan Thibodeaux and I am submitting my written testimony in opposition to SB 181. Upon reading the bill, I was disheartened by the decision to solely focus on the mother's wishes. In lines 6 and 7 of the bill, it explicitly states that "it is vital to the equality and liberty of all individuals" yet disenfranchises the child. The child does not have a say whether or not they are able to protest, as the bill states in line 8, private decision to terminate a pregnancy. I believe that we should be focusing on protecting the unborn child and this bill will not do that.

I understand that New Hampshire recently passed a law that protects unborn children in the last months of the trimester. My hope is for the legislature to continue to protect the rights of these children. SB 181 outright fights against any idea of continuing to protect the child by making the state powerless in defending these unborn children. If we are looking to truly have equality and liberty for all individuals, why does it stop at the unborn?

I humbly ask that the committee votes inexpedient to legislate on SB 118. This bill should not be amending the current RSA and we should do better in the state of New Hampshire to help mothers with their pregnancies and protect the most vulnerable of the United States population: the unborn.

Thank you for your consideration,
Ethan Thibodeaux

The Honorable Sharon Carson January 31st, 2023

Chair, Judiciary Committee

Concord, NH 03301

Testimony in OPPOSITION of SB 181

Good morning, Chair and Members of the Judiciary Committee,

For the record, my name is Alysha Daley and I am submitting my written testimony in opposition to SB 181. Upon reading the bill, I was shocked to see lines 6 and 7 declare this bill would be "vital to the equality and liberty of all individuals." However, this bill would do the opposite, by marginalizing the child involved in the pregnancy. In the Preamble of the Declaration of the United States, in which our country was based, the founding fathers state that everyone is endowed with the unalienable rights of "Life, Liberty, and the pursuit of Happiness." Without this right to Life, all other unalienable rights cannot be upheld. In order to uphold the equality and liberty of all individuals, we must remember the individual child.

I understand that New Hampshire recently passed a law that protects unborn children in the last months of the trimester. My hope is for the legislature to continue to protect the rights of these children. SB 181 outright fights against any idea of continuing to protect the child by making the state powerless in defending these unborn children. If we are looking to truly have equality and liberty for all individuals, why does it stop at the unborn?

I humbly ask that the committee votes inexpedient to legislate on SB 118. This bill should not be amending the current RSA and we should do better in the state of New Hampshire to help mothers with their pregnancies and protect the most vulnerable of the United States population: the unborn.

Thank you for your consideration,

Alysha Daley

Concord, NH 03301

RE: SB 181-FN

Dear Chairwoman Carson and Members of the Committee,

I'm writing in support of the Access to Abortion-Care Act, SB 181, relative to access to abortion care. As mayor of the largest city in New Hampshire, I am compelled to advocate for women in Manchester and from across the state that utilize family planning service providers in our city.

Attacks on reproductive health care across the country make it absolutely necessary to codify protections for women seeking abortion care in New Hampshire. After Roe v. Wade was overturned last year, we can no longer assume our right to bodily autonomy will be protected without proactive measures such as the Access to Abortion-Care Act.

New Hampshire women should be trusted to make personal health care decisions in consultation with their doctors, and without the interference of government bureaucrats. Without the protections of the Access to Abortion-Care Act, women in New Hampshire could be subject to restrictive abortion bans that do not take into consideration the many complex and sometimes difficult situations that pregnant women may face.

Granite Staters overwhelmingly support reproductive freedom and expect their representatives at the State House to protect their rights. I urge you to recommend SB 181 Ought to Pass to the full Senate.

Sincerely,

Joyce Craig

January 31, 2023

Dear Chairperson Carson,

As an Obstetrician-Gynecologist practicing in New Hampshire for more than 30 years, I want to register my strong support for SB 181. I am representing myself as a member of the public.

Through my training in the 1980's, I learned how to do abortions. The procedure is actually the same as doing a "D&C" for a miscarriage, or later in pregnancy for fetal anomalies incompatible with life, it is basically induction of labor. I strongly believe in a woman's right to choose for herself the option of terminating a pregnancy, and that this should be a decision between a woman and her physician. I do not think this right should be taken away by people who might never be in the position of someone who is unable to support another child, or was raped, or was a victim of incest, or whose fetus has a condition incompatible with life.

I continued to do abortions for a few years during my first years in private practice, we did them in the office, up to 10 weeks, for a modest cash fee. I began to have an ethical dilemma due to my spiritual beliefs about not taking life. This clashed with my strong feelings about women's right to choose abortion, but I did stop doing abortions in most cases. There were only a couple cases after that where I did do abortions, in addition to doing abortions for fetuses with conditions incompatible with life. Also, I always told myself if access became restricted, and I was available and trained to do abortions, I would do them again. This was prior to availability of medical abortions, but I still feel the same. Regardless of my personal religious beliefs about the ethics of abortion, I am more strongly opposed to non-clinicians determining what is and is not safe or appropriate for a patient. This is a decision that she should make with her provider.

The first abortion I did after I had decided to stop doing them was a young woman who had recently had a baby. She was on Medicaid and other state aid, and could not afford to care for another baby. She didn't have the ability to drive to the city where abortions were provided. I did an abortion at about 7-8 weeks for her in the office, to help her in her time of need. This also helped the state in terms of not having another person on state aid.

In closing, I strongly support this bill and I urge the honorable members of the Senate Judiciary Committee to do the same. We must keep abortion legal and safe in New Hampshire. I believe it will help prevent further inequality, as restricting pregnancy termination will only make it less available and unsafe as it was it the past prior to Roe v Wade, especially for low income and single mothers.

Sincerely,

Linda J. Haller, MD

Dear members of the Judiciary Committee,

It has come to my attention that you will be discussing bill SB181 today. This is an abhorrent piece of legislation clearly meant to send us back to the dark ages.

All scientific evidence supports the conclusion that babies in the womb are fully human, genetically unique, and sensorially aware. The idea, that the vacuuming and murdering of this unique human life is not only acceptable but moral, is wretched and antithetical to all rational human thought.

Needless to say, anyone who supports this bill will never receive my votes or support as long as I live. Anyone who opposes this bill will likewise receive my eternal gratitude.

It is said, I can put in documents. I will just put in this Youtube video. It shows how babies follow faces, even in the womb. I hope that the first face they see is not the face of their killer.

Respectfully Yours,

Stephen Lajoie

Caution! This message was sent from outside your organization.

Dear Senators Carson and Schelzi:

I am writing to object to SB181 as it allows for unrestricted abortion access and prevents legal protections for unborn children. There needs to be some commonsense restrictions on abortion, if only to educate the mothers as to the other options available to them. Late-term abortions in particular are horrific and inhumane, but all abortions damage the mothers and of course kill the babies, who are human beings entitled to basic legal protections.

If a bill allowing for unrestricted abortion of baby seals and preventing any legal protections for the unborn seal pups was presented for consideration in the Senate, there would be an outcry such as people have never seen. Please give the same consideration to baby humans and their mothers, many of whom do not fully understand the step they are taking in "terminating their pregnancies."

Thank you for your consideration.

Sincerely,

Tom Allen

Testimony in OPPOSITION of SB 181

January 31 st , 2023

Good morning Chair and Members of the Judiciary Committee,

For the record, my name is Ethan O'Connor and I am submitting my written testimony in opposition to SB 181.

It is clear that the proposed bill will not support the common good of our citizenry--and especially not the suffering, careworn, desperate mothers whose liberty it feigns to defend.

The proposed bill is a contradiction. Under the guise of defending the rights of mothers it offers them no more than the license to trample the rights of others--their own flesh and blood at that.

It is laudable to defend the "liberty of the individual", which is the claim of SB 181. Unless this defense of liberty applies to every individual under the law, both mother and child, it is incoherent and a promotion of injustice.

Ours is a land that promises liberty and justice--not for the few at the expense of the many, nor for the many at the expense of the few--but for all. Individuals in the womb cannot speak for themselves, or defend themselves. And so we must promote and call for just legislation in NH that will offer both mothers and their babies true care, true support, meaningful solutions, and the empowerment they deserve.

New Hampshire's motto is "Live Free or Die." If we enshrine in law the license to snuff out defenseless life, our noble motto, meant to be voiced by free men and women, will become a darkly ironic death sentence for all those innocents who will never be given the opportunity to experience freedom, but will only know death.

I humbly ask that the committee votes inexpedient to legislate on SB 118. This bill should not be amending the current RSA and we should do much better in the state of New Hampshire to help mothers with their pregnancies and protect the most vulnerable of the United States population: the unborn.

Thank you for your consideration,
Ethan O'Connor

Subject: SB181 opposition

Caution! This message was sent from outside your organization.

Regarding Bill SB181. I am opposed to this bill for the following reasons.

1.) Life begins in the womb at conception and therefore should be protected by the constitutions right to life. Abortion is the killing of another human being.

2.) Many of the women who we claim to be protecting by allowing abortion are traumatized by it. They are in situations of great stress and are making this decision in a state of trauma. They need to be given love, support and forgiveness so that they can truly get through this. Death is not an answer for them.

3.) The section of the bill making it a criminal offense to impede the right to abortion is very dangerous. Parents of teens, fathers of the children, Pro-life advocates who want to pray in public peacefully, doctor's who want to practice without going against a strong moral belief etc. These people are all at risk of having their rights taken away in the name of "rights of a woman".

4.) To support Life we can not kill, To support Liberty means to provide a community where people can thrive and make decisions in a healthy manner, not under stress and to support the pursuit of happiness does not mean helping people to commit acts that will haunt them for a lifetime.

Please make the right choice and know that the right choice is not always the popular choice. Do not be guided by fear but by faith. You will have support.

Celeste Horan
Resident of Candia NH.

HEALTH CENTER
Sexual Health, Choice & You

SB 181: relative to access to abortion care

Committee: Senate Judiciary

Date: January 31, 2023

Position: SUPPORT

Joan G. Lovering Health Center is an independent non-profit health center in Greenland, NH. We have over 42 years of experience providing reproductive and sexual health care to New Hampshire citizens. **We provide abortion care** in addition to access to affordable contraception, sexually transmitted infection testing, treatment, and prevention; and preventative health screening; all of which are central to our mission.

The June 2022 US Supreme Court decision overturning the protections of both *Roe v. Wade* and *Planned Parenthood v. Casey*, makes it CRITICAL that New Hampshire actively protects the right to abortion for all citizens. To date, 14 states have banned abortion outright and 18 states have abortion bans that limit abortion access. Millions of Americans are impacted by the bans in place across the country. The Lovering Health Center has seen patients from remote states seeking care in New Hampshire due to restrictions in their home states.

We must do everything we can to protect New Hampshire citizens' freedom to make their own reproductive health choices, including the choice to seek an abortion. By doing so, we protect our citizens' privacy and afford them the respect of bodily autonomy. We also protect New Hampshire citizens from the undue burdens of added travel, expense, anxiety, and complication that comes with having to arrange care outside of their home community.

The Access to Abortion-care Act upholds New Hampshire values by putting into law that the state cannot further interfere in the right to access abortion. SB 181 does not amend any current abortion laws. SB 181 establishes important protection as state law, bringing New Hampshire in line with every other state in New England. With the lack of federal protections, the time to provide this protection is NOW.

Please vote **Ought to Pass on SB 181**, the Access to Abortion-care Act.

The Honorable Sharon Carson January 31 st , 2023
Chair, Judiciary Committee
Concord, NH 03301

Testimony in OPPOSITION of SB 181

Good morning Chair and Members of the Judiciary Committee,

For the record, I am submitting my written testimony in opposition to SB 181. Upon reading the bill, I was disheartened by the decision to solely focus on the mother's wishes. In lines 6 and 7 of the bill, it explicitly states that "it is vital to the equality and liberty of all individuals" yet disenfranchises the child in the womb. The child does not have a say whether or not they are able to protest the, as the bill states in line 8, private decision to terminate a pregnancy. I believe that we should be focusing on protecting the unborn child and this bill will not do that.

I understand that New Hampshire recently passed a law that protects unborn children in the last months of the trimester. My hope is for the legislature to continue to protect the rights of these children. SB 181 outright fights against any idea of continuing to protect the child by making the state powerless in defending these unborn children. If we are looking to truly have equality and liberty for all individuals, why does it stop at the unborn?

I humbly ask that the committee votes inexpedient to legislate on SB 118. This bill should not be amending the current RSA and we should do better in the state of New Hampshire to help mothers with their pregnancies and protect the most vulnerable of the United States population: the unborn.

Thank you for your consideration,
Eileen

Subject: Testimony in support of SB181

Caution! This message was sent from outside your organization.

Good evening to the members of the Judiciary Committee,

Below is my testimony in support of SB181. Thank you very much for taking the time to read it, and thank you for all you do.

"My name is Sophie Merrow and I live in Portsmouth. I volunteer with the Lovering Health Center, and with the Reproductive Freedom Fund of New Hampshire. I am proud to play a small part in helping others access compassionate reproductive care.

I am *not* proud of the fact that New Hampshire remains the only state in New England with no protections for reproductive freedom.

The bottom line is that reproductive freedom and bodily autonomy are essential liberties. Without them, I am not a full, equal citizen. If the state can tell me if, when, and how I become a parent, I am not free. If the state can take those choices away from me, I cannot participate equally in society. This is completely unacceptable.

The right to safe, accessible abortion cannot be subject to the whims of politicians elected every two years. Reproductive freedom is a fundamental human right, and the vast majority of Granite Staters agree. It is beyond past time for us to protect it."

Thank you,

Date: January 31, 2023

Chair, Judiciary Committee

Concord, NH 03301

Re: Testimony in Opposition to SB181

Chair and Members of the Judiciary Committee,

"All men have certain, natural, essential, and inherent rights among which are, the enjoying and defending life and liberty....Equality of rights under the law shall not be denied or abridged by the state". These words, ratified in the New Hampshire Constitution on June 2, 1784, set forth the primary purpose for which governments are instituted and provides an irrefutable directive for the actions of the government of this state. However, SB 181 threatens this purpose by allowing the inherent rights of the most vulnerable, the unborn child, to be categorically dismissed under the guise of "equality and liberty of all individuals". Lest we forget, the Declaration of Independence, the embodiment of our identity as Americans, and the Constitution of the this State, present to us a hierarchy of the inherent rights of all individuals. In each of these documents, the right to life always precedes and supersedes all other rights, including that of liberty. This is because the right to life is wellspring from which all other liberties flow. Without life, there is no liberty. Consequently, this bill seeks to disrupt this order by placing a lower right, liberty, ahead of the higher right to life. Instituting such a bill would be a travesty not only in its consequences for the unborn, but also its threat to the legitimacy of the NH legal and governmental system whose purpose it is to protect the rights of the most vulnerable.

In relation to this, SB 181 presents issues to legal and human reasoning in the very wording of the bill itself. SB 181 states that it is public policy "vital to the equality and liberty of all individuals". This creates a conundrum of reason in that, to encompass all individuals, equality and liberty must be extended to the unborn whose rights this bill undermines. To claim this is not the case would be to insinuate that 1) the unborn are not human beings and, thus, have no rights; and 2) that rights of liberty for some supersede the rights of others. Consequently, in order to justify the passing of SB 181, the State of NH must be willing to first define when a human being attains the inherent rights described in the NH Constitution and what conditions affect this protection of rights. Second, the committee must also provide able justification for the superseding of a person's right to liberty over a different person's right to life. If the legislature and judiciary are unable or willing to answer these questions, the bill should not be passed simply on the grounds of legal consistency.

Finally, the protection of the unborn is of the utmost importance to both the state and the society. Children are the hope of the future and provide infinite benefits to our society. A people who does not respect and protect the rights and lives of the unborn and children is destined for moral and social decline. As such, true care for mothers in crisis pregnancies should be at the forefront of the state's initiatives. Greater funding for crisis pregnancy centers that provide much

needed medical, spiritual, emotional, and physical assistance, as well as incentives for adoption would better serve the interests of NH than SB 181, all while protecting the equal rights, liberty, and dignity of both mother's and children. Moreover, the state should strive to enact just laws that bind men to care for the child they have helped to create and the mother they have impregnated. While this brings its own challenges, the rebuilding and respect of the family unit as the building block of our society can bolstered by the support of the state.

In conclusion, I ask that the state reject the amendments proposed in SB 181 and that the current RSA remain in place unchanged.

Sincerely,

Zachary Bald

EHC **Equality Health Center**
Quality • Compassion • Respect

SB 181: relative to access to abortion care
Committee: Senate Judiciary
Date: January 31, 2023
Position: SUPPORT

Dear Honorable Members of the Committee,

The Equality Health Center (EHC), located in Concord, is a non-profit healthcare facility serving all genders and sexualities throughout New England. We have been providing individualized, quality, compassionate care with respect since 1974. **We are New Hampshire's longest standing abortion provider.**

EHC appreciates the opportunity to submit written testimony in **support** to SB 181-Access to Abortion-care Act.

ECH's mission is to advance health by empowering our clients and communities through advocacy, education, and the provision of quality, non-judgmental healthcare with expertise in sexual, reproductive, and gender-affirming services.

As states across the county will move to ban abortion in 2023, individuals will have to travel further to seek legal and safe abortion care. This adds more undue stress to individuals seeking abortion care as well as a tremendous financial burden. Today, over 20 million people have been impacted by the Supreme Courts overturn of Roe v. Wade. One in three people of reproductive age across the country have lost access to abortion care in their home state.

Now that there are no longer federal constitutional protections for abortion rights, NH lawmakers need to show Granite Staters that by putting into law the Access to Abortion-care Act the state will not interfere in the right to access an abortion. With all the New England States around us protecting personal rights, NH needs to do the same!

For Granite Staters to have their personal rights to private health care decisions, please vote Ought to Pass on SB 181, the Access to Abortion-care Act.

Respectfully submitted,

Jinelle Hobson, Executive Director

Subject: Re: Please vote NO (ITL) on SB

Caution! This message was sent from outside your organization.

Honorable Committee Members,

I am writing to ask you to please vote NO (ITL) on SB 181 which would prohibit any additional restrictions to NH's Fetal Life Protection Act.

I would like to see the fatal fetal anomaly exception repealed and to take the current abortion ban down to a more moderate 12 or 15 weeks.

Children are a blessing.

Please vote ITL on SB 181.

Thanks so much for your time and service.

Laura L. Preston

Salem, NH

TO: Chairwoman Carson and members of Senate Judiciary Committee

FROM: MacKenzie Nicholson, NH Senior Director, MomsRising

DATE: Tuesday, January 31, 2023

Thank you Chairwoman Carson and members of the Senate Judiciary Committee for allowing me to submit this testimony in support of the Access to Abortion Care Act. My name is MacKenzie Nicholson and I am the New Hampshire Senior Director of MomsRising, an on-the-ground grassroots organization representing thousands of moms and their families across the Granite State. I've lived in New Hampshire my entire life and currently reside in Nottingham with my husband and our two kids.

When I got pregnant with my son, my partner and I took some time to decide if having a baby was right for us. We were both young, not well established in our careers, but something led us to believe it was the right decision to have him. I have never regretted that decision. He is what brought our family together and showed us both love like we never knew possible.

Yet eight months after his birth, my partner and I were faced with another tough decision. I was pregnant again, and I knew that it wasn't the right time to expand our family. I knew that if I followed through with this pregnancy, my family's story would be very different from the one I had imagined.

And I'm not alone - **six in ten people who have abortions are moms**[1]. Being able to choose if we have children, and if so, when and how many children to have, is a fundamental human right. We know that having agency over what we do with our bodies is beneficial not only for our reproductive rights. It also helps to narrow the gender pay gap, improve the health of women and their families, and lead women toward access to increased economic and political involvement.

New Hampshire moms want abortion care to be accessible to all who need it. In fact, 66 percent of Granite Staters believe that abortion should be legal in all or most cases.[2] A MomsRising member from Manchester recently shared with us that the birth of her first child left her dealing with chronic health conditions that were significantly affecting her life. When she found out she was pregnant less than a year after that traumatic birth, she knew that for her health, her family's health, and their financial stability, abortion was the right decision for her.

Reproductive rights are human rights. Forced births and denials of health care are never okay. There is no state where banning abortion is popular.[3] Please vote Ought to Pass on SB181, the Access to Abortion Care Act, and uphold our long-held Granite State values by putting into law that the state cannot further interfere in the right to access abortion.

Subject: Follow-up materials from Planned Parenthood NH Action Fund on SB 181

Follow Up Flag: Follow up
Flag Status: Flagged

Caution! This message was sent from outside your organization.

Good morning, Honorable members of the Senate Judiciary Committee—

Thank you for hearing our testimony last week regarding SB 181. I wanted to follow-up with some resources, based on questions raised throughout the afternoon.

I want to reiterate that the legal landscape across the country, including here in New Hampshire, without *Roe v. Wade*, is unclear. *Roe* served as the foundation of legal protections, and with it overturned, those federal protections are gone. States like Missouri have tried and are continuing to try to restrict patients from accessing abortion in other states. The Texas abortion ban includes a "bounty hunter" provision allowing essentially any individual – anywhere – to seek a civil lawsuit against anyone who "aids and abets" an abortion, which is a provision that has not been struck down by the court. Local municipalities across the country are also attempting to pass local ordinances, including to restrict medication abortion, as seen in Minnesota.

In New Hampshire, we do not have a law recognizing the right to an abortion before 24 weeks. RSA 329:49 explicitly states, "Nothing in this subdivision shall be construed as creating or recognizing a right to abortion." **Passing SB 181 would put the right, prior to 24 weeks, explicitly into state law.**

The question of specific court cases from across the country came up during my testimony. I'm including three here as current examples, which could directly impact Granite Staters:

- *Alliance for Hippocratic Medicine et al v. U.S. Food and Drug Administration et al*
  - The consequences of this case could be incredibly far-reaching — and go as far as taking mifepristone entirely off the market nationwide — even in states where abortion is accessible and protected. Mifepristone is used in more than half of abortion procedures nationwide, and taking it off the market would significantly compromise abortion access across the country — including in New Hampshire, as well as states that have secured abortion rights.
- *Deanda v. Becerra*
  - This case has the potential to change how young people get access to birth control.
- *Ohio v. Becerra*
  - This lawsuit seeks to reinstate the previous administration's domestic gag rule in the Title X family planning program, which would deny pregnant patients critical information and could dramatically limit the ability of sexual and reproductive health care providers to participate in the program

Additionally, I referenced polling from St. Anselm in August, which can be found here.

As always, I would be happy to answer any additional questions the committee may have. We once again urge you to vote Ought to Pass on SB 181. Thank you for your consideration,

Liz Canada

ACCESS TO ABORTION CARE ACT

January 2023

In June of 2022, the US Supreme Court overturned *Roe v Wade*, the landmark 1973 case that made abortion legal in all 50 states. Without this constitutional right, state politicians now have the ability to ban abortion entirely. Since *Roe* was overturned, 18 states have banned abortion, with abortion being completely unavailable in 14 states. At this time, 20 million people have lost access to abortion in their home state, including 1 in 3 women of reproductive age. This has created chaos and confusion in the health care landscape.

Now, more than ever, it's critical New Hampshire takes action to safeguard abortion access. The New Hampshire legislature has the opportunity to return to its long, bipartisan tradition of upholding privacy when it comes to personal medical decisions. New Hampshire has one of the highest levels of public support in the country when it comes to reproductive freedom, but with the shifting landscape of a post-*Roe* world, the New Hampshire legislature must act now. An individual's ability to access abortion care is a matter of equality and liberty for all Granite Staters.

With no federal constitutional protections in place, New Hampshire must make it clear to its residents and the nation that it is a state that values privacy, freedom, and individual decision-making by passing the Access to Abortion-care Act.

The Access to Abortion-care Act (AAA), House Bill 88 and Senate Bill 181, upholds long-held New Hampshire values by putting into law that the state cannot further interfere in the right to access abortion. This bill does not change any current New Hampshire abortion laws; it does, however, provide critical assurances to Granite State patients and families that they can work with their doctors to get the health care they need in the majority of situations.

The time to protect reproductive rights has never been more critical. New Hampshire remains the only state in New England without protections in state law for abortion access. The health care landscape in this country has been upended, creating an influx of patients to states where abortion is legal, increasing wait times, and legal limbo for many states. New Hampshire abortion providers have seen an increase in patients from banned states and will continue to in the coming months and years. It's clear from ballot initiatives across the country, from California and Vermont, to Kansas and Kentucky, that people support the right to have an abortion.

A broad network of interfaith clergy across the state have signed on in support of the Access to Abortion-care act. Our faiths and sacred texts compel us to support bodily

autonomy, freedom of conscience, and safe access to necessary health care without shame, or fear of reprisal. We urge our leaders in Concord to pass the Access to Abortion-care Act and protect these sacred rights here in New Hampshire.

Good afternoon, Committee Members,

My name is Patti Mullin, I am a resident of Sunapee, and I am here to SUPPORT SB 181, the Access to Abortion-care Act. Access to abortion is essential, and my abortion saved my life.

My mother had four daughters, my sister Deirdre, eighteen months later I arrived, seven years later came the twins. My father was an abuser and a traveling salesman. Three months after the twins were born my mother discovered my father had two other wives. The next few years found us on welfare, living in the projects, and once homeless.

Mom remarried when I was eleven. A NYC fireman with a shield.
Not a badge, in NYC it's a shield. I do not say his name, I call him The Evil One. The Evil One bought a nice home and moved the five of us in. The four of us spent the rest of our childhoods being raped, beaten, emotionally, mentally, and spiritually tortured. We would call the police, but he had a shield.

My sister, Deirdre, died from suicide this past July. My Irish twin.
She was a brilliant woman, graduated from Fordham with her MSW and a 4.0 average after raising three brilliant children.
Deirdre started having memory issues at sixty-two. It turned out Deirdre had multiple traumatic brain injuries; the dementia was rapid. She hated losing her mind. The Evil One used to grab us by our hair and bang our heads against the walls or the floor. If we were on the floor, he would kick us with his steel toed boots. I had a baseline MRI to check my brain. Deirdre died from the beatings.

My sister tried to protect us. She saved my life when I was sixteen. My period was two weeks late, I was terrified. I was always terrified. I told Deirdre and she took me for a urine test. By now I was three weeks late. I found out I was pregnant at 8 weeks. Her first words to me were, "Jesus Christ Patti if he finds out you are pregnant, he's going to beat you to death!" I knew this was literally the truth. We scheduled an abortion; it would be two weeks. Those two weeks were the longest weeks of my life. By the time I had my abortion, I was 10 weeks pregnant.

Everyone in the world has their own personal reason to choose abortion. My reason was abject fear of being beaten to death. The freedom to choose saved me. One of my therapists once told me that in thirty years of practice my childhood was the worst she ever heard. I am here today, speaking to you, only because I had access to an

abortion. If you think I am overly dramatic for any reason, just think of my sister who died from multiple traumatic brain injuries.

I have a daughter now. A beautiful, educated, kind and generous young woman. I cannot fathom why she should be denied access to the reproductive health care that saved my life.

I knew what was best for me at sixteen. No one was protecting me. The choice I made was the first time in my sixteen years I was able to protect myself. Access to abortion must be available to all. Each of our lives and circumstances are different, but no matter our reason, each of us must have access to abortion personally behind closed doors, free from government intrusion and interference No one else knows our stories, none of you knew me or what was best for my life.

Reproductive Rights saved my life. Abortion saved my life.

Please vote "Ought to Pass" on SB 181.

Thank you for hearing my testimony.

DIOCESE OF MANCHESTER

January 31, 2023

Senator Sharon Carson, Chair
And Members of the Senate Judiciary Committee
State House
Concord, NH 03301

Re: **SB 181 (Creating a Statutory Right to Abortion)**

Dear Senator Carson and Members of the Committee:

As the Director of the Office of Public Policy of the Roman Catholic Diocese of Manchester, and on behalf of Bishop Peter Libasci, I write to respectfully register our **opposition to SB 181**, which would create a statutory right of "access to abortion care." The bill seeks to create an affirmative public policy that declares abortion to be "vital to the equality and liberty of all individuals." It probably goes without saying that we could not disagree more strongly with this statement.

I suspect that most people in New Hampshire, regardless of political or religious persuasion, share a concern that the fundamental principles of human dignity and solidarity are beset by many challenges today. But the work of building dignity and solidarity certainly will not be advanced by the passage of a law that would affirmatively declare certain human beings to be disposable. I ask the Committee to carefully consider these important insights from Pope Francis:

> **[The] defense of unborn life is closely linked to the defense of each and every other human right. It involves the conviction that a human being is always sacred and inviolable, in any situation and at every stage of development. Human beings are ends in themselves and never a means of resolving other problems. Once this conviction disappears, so do solid and lasting foundations for the defense of human rights, which would always be subject to the passing whims of the powers that be.**

Pope Francis, Encyclical Letter *The Joy of the Gospel*, 213 (2013).

It is also important to recognize just what SB 181 actually encompasses. The bill would affirmatively sanction all abortions except for those enumerated in the bill; namely, abortions prohibited under the Fetal Life Protection Act (RSA 329:44 ff.) and those

which do not comply with the parental notification law (RSA 132:34 ff.). This means that among the types of abortion that SB 181 would deem "vital to the equality and liberty of all individuals" would be, for instance, abortions done for purposes of sex-selection or because the unborn child is presumed to have a disability.

Therefore, I respectfully urge you to vote ITL on SB 181.

Thank you as always for your kind consideration of our views.

Very truly yours,

Robert E. Dunn, Jr., Esq.
Director, Office of Public Policy

new hampshire
WOMEN'S FOUNDATION

To: Chairman Carson and members of the Senate Judiciary
Re: Testimony in Support of SB 181: relative to reproductive rights (Access to Abortion-care Act)
Date: January 31, 2023
Position: OUGHT TO PASS

The New Hampshire Women's Foundation invests in equality and opportunity for New Hampshire women and girls through research, education, advocacy, and grantmaking.

We believe SB 181 Ought to Pass because access to the full range of reproductive health care, including abortion, is crucial to women's health, economic security, and long-term impacts on women and their families.

New Hampshire Context in the Region and Country
The "Live Free or Die" state has had a long, bipartisan history of supporting abortion access, however, New Hampshire is the only state in New England that has not protected the right to abortion in state law. The June 2022 Supreme Court decision in *Dobbs v. Jackson Women Health Organization* eliminated the federal right to abortion and left access up to the states. Though abortion is legal up to 24 weeks in New Hampshire, the people of this state deserve to know that the legislature will protect the right to safe, legal abortion amid a rapidly changing landscape in the rest of the country.

Reproductive Health Care is Crucial to Women's Health
We support SB 181 because we believe women, and people who can become pregnant, have the right to make decisions about their bodies, their families, and their lives. Not only is the choice to end a pregnancy a right, but it is, for some, a means to economic prosperity, safety and the ability to flee violence, and the opportunity to pursue dreams and develop thriving communities. In New Hampshire, women are more likely to live in poverty, with a gender wage gap that increases by race, ethnicity, and county, and are more likely to have been impacted by interpersonal and/or sexual violence. These indicators of well-being are all significantly impacted by the ability to make reproductive decisions, including abortion, for oneself. We must protect the right to abortion to continue to support women's autonomy, health, wellness, economic security, and ability to support thriving families and communities in New Hampshire.

Economic Impacts of Limiting Access
The autonomy of women and people who can become pregnant to make decisions about their reproductive health, improvements in abortion access is crucial. Also crucial are the economic impacts for women and their families. Deciding whether and when to have a child is the most consequential decision relative to a woman's lifetime economic well-being, so it is important that all choices, including abortion, are available to those who face unintended pregnancy. Women who are denied an abortion go on to experience economic hardship and economic insecurity,

lasting for years and impacting the next generation. Providing access to all reproductive health care including abortion will promote greater economic security for New Hampshire women and families in three keys areas:

1) **Long Term Economic Security** – Control over reproductive health allows women to invest more heavily in their potential, including increased schooling and job training, which contribute to greater long-term economic security. Women who have access to abortion have higher rates of high school and college graduation.[1]

2) **Labor Force Participation** – It takes 4 years on average for a woman to return full-time to the workforce after childbirth following abortion denial.[2]

3) **Multi-Generational Impact** – Abortion access not only has economic benefits for the pregnant person, but also benefits other children (born previous or subsequent) in her household: lower rates of poverty and higher rates of high school graduation and college attendance.[3] Access to abortion contributes to the economic mobility of women and is critical to disrupt the cycle of poverty between generations. When women are healthy and prosperous, their families succeed and our communities grow stronger.

Conclusion

Access to reproductive health care, including abortion, provides opportunities for women to further their education, strengthen their economic security, and improve their ability to parent existing or future children, if they choose. New Hampshire should join the rest of New England in assuring that Granite Staters will continue to have access to abortion.

WHEN YOU KNOW THE FACTS, YOU CAN ACT!

2022: ISSUE 2

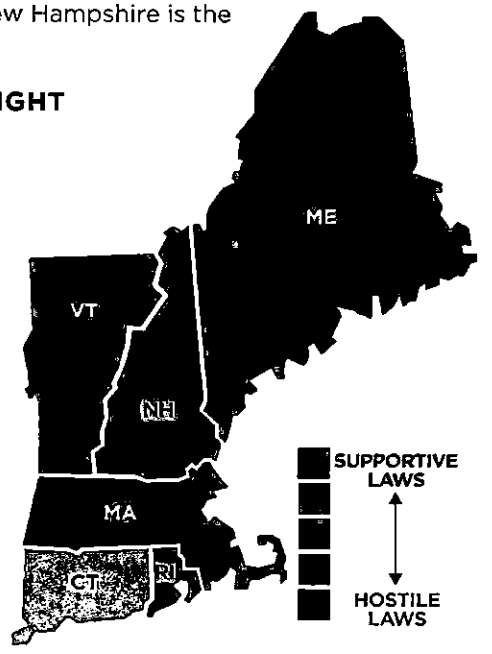

Abortion Rights in New Hampshire

Abortion is legal in New Hampshire, and the "Live Free or Die" State has has a long, bipartisan history of supporting abortion access. However, in June 2021, Governor Sununu signed the first abortion ban in modern history, banning abortions after 24 weeks. In June 2022, the U.S. Supreme Court, in *Dobbs v. Jackson Women's Health Organization*, eliminated the federal right to abortion, leaving abortion rights up to the states. New Hampshire is the only state in New England that has not protected the right to abortion in state law.

NEW HAMPSHIRE: ONLY NEW ENGLAND STATE TO NOT PROTECT RIGHT TO ABORTION

ABORTION LAWS IN NEW HAMPSHIRE

- Abortion is legal up to 24 weeks; after 24 weeks, there are exceptions for fatal fetal diagnosis and life of the pregnant person, but no exceptions for rape or incest.[1,2]
- Health care providers who perform an abortion after 24 weeks can be charged with a Class B felony and be sued for damages in civil court.[3,4]
- Parental notification is required before a minor under 18 years old may access abortion, unless authorization is granted by a New Hampshire Superior Court judge.[5]
- NH Medicaid will cover abortion only in the cases of rape, incest or life endangerment of the pregnant person.[6]

CLINICS PROVIDING ABORTION IN NEW HAMPSHIRE

- Equality Health Center, Concord, NH
- Joan G. Lovering Health Center, Greenland, NH
- Planned Parenthood, Keene, NH
- Planned Parenthood, Manchester, NH

**Note: There are other non-clinic abortion providers in the state including hospitals and physician offices.*

In 2020, 2,050 abortions occurred in New Hampshire, the lowest rate among New England states.[7] Nationally and in New Hampshire, abortion has declined due to a combination of factors, including increased use of long-acting reversible contraception.[8]

TIMELINE OF ABORTION LAWS IN NEW HAMPSHIRE[9]

1973
JANUARY 22, 1973
The U.S. Supreme Court decides *Roe v. Wade*, protecting the right to abortion in the U.S.

1980

1997
JUNE 3, 1997
Governor Jeanne Shaheen signs the repeal of three pre-Roe anti-abortion laws in New Hampshire. There were four Republican and five Democratic sponsors of the bill.

1990

2021
JUNE 25, 2021
Governor Chris Sununu signs first abortion ban in modern New Hampshire history, prohibiting abortion after 24 weeks, without exceptions for rape, incest, or fatal fetal anomaly, and including an ultrasound mandate for all individuals seeking an abortion, regardless of medical necessity.

2000

2022
MAY 27, 2022
Governor Sununu signs legislation which addressed some of the harm his abortion ban caused, by adding a critical exception for fatal fetal diagnoses and repealing the ultrasound mandate.

2010

2022
SPRING 2022
The New Hampshire House and Senate rejects efforts to enshrine abortion rights before 24 weeks in state statute.

2020

PARENTAL NOTIFICATION 2003 – 2011

JUNE 19, 2003
Governor Craig Benson signs a bill requiring parental notification for people under 18 seeking abortion care, which lacked explicit exception to protect the health of the pregnant minor.

NOV. 30, 2005
Then-Attorney General Kelly Ayotte appeals the decision of the lower courts and argued *Ayotte v. Planned Parenthood of Northern New England* in the U.S. Supreme Court.

JAN. 16, 2006
The U.S. Supreme Court rules unanimously, 9-0, affirming the lower court's decision in favor of Planned Parenthood of Northern New England.

JUNE 29, 2007
Governor John Lynch signs legislation to repeal the parental notification law.

JUNE 22, 2011
The New Hampshire Legislature passes another parental notification bill, providing an exception for the health of the minor, overriding a veto by then-Governor John Lynch.

2022
JUNE 24, 2022
U.S. Supreme Court overturns *Roe v. Wade* in *Dobbs v. Jackson Women's Health Organization*, removing federal abortion protections and leaving abortion rights up to each state.

TERMINOLOGY

Buffer Zone / Patient Safety Zone: Enacted laws that either prohibit acts such as vandalism and obstruction at abortion clinics or limit protests aimed at abortion clinics, to provide safe passage for patients and providers.[10]

Fatal Fetal Diagnosis: Condition likely to lead to the death of the fetus in utero or shortly after birth.[11]

Medication Abortion: Includes the use of two medications, mifepristone and misoprostol, to safely end a pregnancy.[12]

Viability: The ability for a fetus to survive outside the uterus.[13]

POST-ROE POLICY PRIORITIES IN NEW HAMPSHIRE[14]

1. **Pass proactive legislation to enshrine the right to access abortion in New Hamsphire.**
2. **Amend New Hampshire's Constitution to enshrine the right to access abortion in New Hampshire.**
3. **Repeal current abortion restrictions.**
4. **Address disparities in abortion care based on geographic location, including for abortion later in pregnancy.**
5. **Support policies to ensure abortion and abortion-related care is covered for all patients, regardless of insurance.**
6. **Increase the number of providers who offer abortion care.**
7. **Defeat anti-abortion legislation in the State House.**

**See the New Hampshire Abortion Access Coalition's site for the full agenda for the future of abortion access in New Hampshire: NHAbortionAccess.Org*

A NOTE ON INCLUSIVE LANGUAGE

While women are the majority of people who need abortion care, our language in this report (including "pregnant person" and "people who can become pregnant") reflects and ackowledges that other marginalized groups, including trans men, nonbinary and genderqueer folks who have uteruses, also need access to abortion and reproductive health care.

ACLU New Hampshire

Support SB 181: Protect Granite Stater's Right to Abortion

Thank you Honorable Chair Carson and Members of The Committee,

- Just last week, on January 22nd, we should have celebrated what would have been the 50th anniversary of Roe v. Wade. However, we're now instead facing the ruling's devastating impacts to people and families across the country.
- Post Dobbs, abortion is still legal in New Hampshire; however, there are no protections in place for the right to have an abortion.
- At least 66 clinics across 15 states have stopped offering abortion care.[1]
- 12 states have banned abortion outright.[2]
- And despite that nearly 1 in 4 women have had an abortion at some point in their lifetime,[3] as many as 1 in 3 American women of reproductive age have lost access to abortion in their home state.[4]
- We've seen that many of these severe bans on abortion have come to be through paths of incrementalism.
    - In Texas, a 24-week abortion ban was issued in 2005. In 2013, the state issued a 20-week ban with few exceptions. Since then, legislators have dismantled access to abortion by changing insurance policies in 2017, and placed burdensome and

[4] Katie Shepherd, *1 in 3 American women have already lost abortion access. More restrictive laws are coming.* The Washington Post, aug. 22, 2022, available at https://www.washingtonpost.com/nation/2022/08/22/more-trigger-bans-loom-1-3-women-lose-most-abortion-access-post-roe/

targeted restrictions on reproductive health centers in 2019. Texas finally passed a 6-week or *near total* ban on abortion in 2021.[5]

  - Where we are in the Granite State now is where Texas was in 2005. We currently have 24-week abortion ban that was passed two years ago and there will always be politicians eager to chip away at abortion access like we've seen in Texas.

- Seventy-two percent of polled Granite Staters identified as pro-choice in 2022,[6] and nationally, – every ballot initiative in November strongly went toward supporting abortion rights, even in deep red states like Kentucky.[7]
- Granite Staters are concerned and worried about their right to abortion, an essential component of reproductive health care.
- It's time to make explicit abortion is protected here in New Hampshire. Because right now, we don't have any protections under NH law.
- Protecting abortion access is part of the battle for racial equity, for public safety, for privacy, and so much more.
- We have to make clear that the State of New Hampshire protects abortion access by passing The Access to Abortion-care Act (AAA), *SB 181*, which puts into law that the state cannot further interfere in the right to access abortion.

Planned Parenthood of Northern New England

Planned Parenthood Act. No matter what.

Planned Parenthood New Hampshire Action Fund

SB 181: relative to access to abortion care.
Committee: Senate Judiciary
Date: January 31, 2023
Position: SUPPORT

Last year, the Access to Abortion-care Act was introduced with the anticipation – and fear – of *Roe v. Wade* being overturned by the U.S. Supreme Court. Some legislators wanted to wait to see what the Court would decide before voting in support of this piece of legislation, and in the New Hampshire Senate, the bill, SB 436, died on the table after a 12-12 vote.

In June, the U.S. Supreme Court overturned *Roe v. Wade* and *Planned Parenthood v. Casey*. This decision, overturning almost 50 years of precedent and upending reproductive health care across the country, has resulted in confusion and chaos. Since the ruling in June 2022, 18 states have banned abortion, with 14 states banning abortion outright. As of today, 20 million people have been impacted already, with 1 in 3 women of reproductive age across the country losing access to abortion in her home state.

With state legislatures reconvening, more states will move to ban abortion in 2023 – pushing access to abortion even further out of reach. As states ban abortion, patients have to travel farther, and later in their pregnancies, to seek safe, legal abortion care. With the newly-enacted bans across the country, patients have traveled hundreds of miles to Northern New England – if they can find child care, if they can afford it, and if they can take time off of work. Specifically, Planned Parenthood of Northern New England has seen a 6.2% increase in out-of-state patients, and this figure is expected to increase as more abortion bans are enacted in 2023.

The *Dobbs* decision introduces new factors into the health care landscape in every state, as individual states now control what used to be decided between patients and clinicians. Here in New Hampshire, abortion remains safe and legal until 24 weeks, with some exceptions, including the critical exception for a fatal fetal diagnosis, passed into law in 2022 through HB 1609 with broad bipartisan support. Now that there are no longer federal constitutional protections for abortion rights, however, it's on New Hampshire lawmakers to offer clarity in a legally, ethically, and clinically chaotic country for reproductive rights.

We urge you to support SB 181, the Access to Abortion-care Act, to provide critical assurances to Granite Staters that they have the right to make personal, private health care decisions without government interference.

The Access to Abortion-care Act upholds long-held New Hampshire values by putting into law that the state cannot further interfere in the right to access abortion. SB 181 does not amend any current abortion laws; instead, it enshrines into law what we have heard elected officials say since HB 1609 was passed – that they will not seek further restrictions. SB 181 takes those words and turns them into action. Therefore, this bill is a win-win: protections will be placed into state law, bringing New Hampshire in line with every other state in New England, and lawmakers will demonstrate their support for protecting an individual's personal rights here in New Hampshire as an immediate reaction to the sudden lack of federal protections.

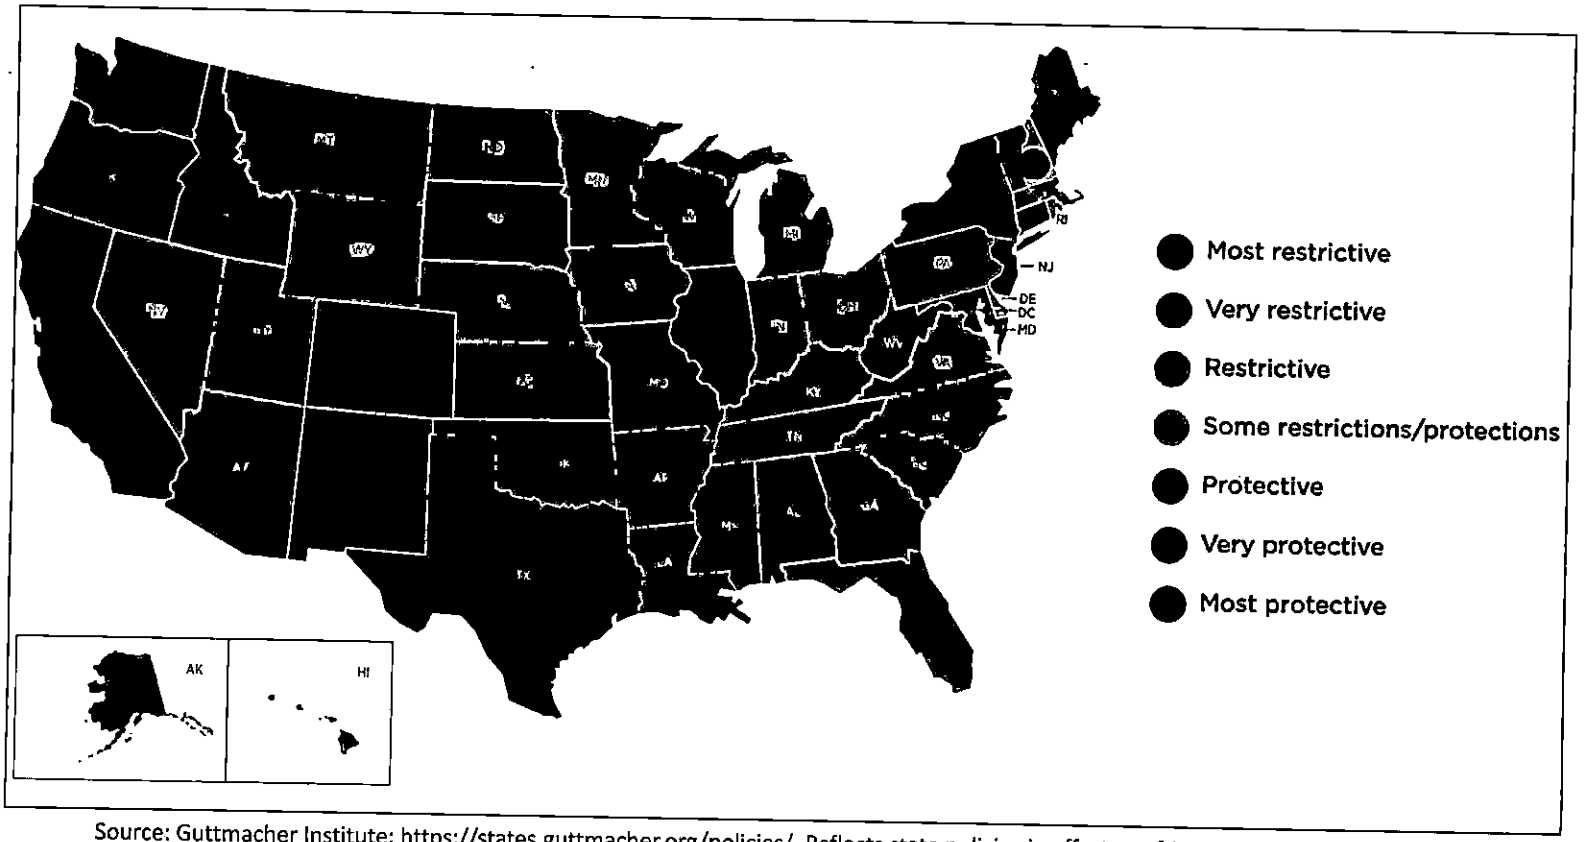

We call on this Legislature to show their constituents they support the types of protections afforded under *Roe v. Wade* and support people's freedom to make their own private medical decisions, which includes abortion. Please vote **Ought to Pass** on SB 181, the Access to Abortion-care Act.

Planned Parenthood of Northern New England (PPNNE) *is the largest provider of reproductive and sexual health care across the State of New Hampshire. We serve New Hampshire residents through 5 health centers in Derry, Exeter, Keene, Manchester and White River Junction, VT. Last year we saw more than 10,000 patients at these sites. PPNNE was named a 2021 Guardian of Excellence Award® winner by Press Ganey, the national leader in health care consumer and workforce engagement. Press Ganey recognizes PPNNE as a top-performing health care organization, achieving the 95th percentile or above for performance in patient experience, out of more than 20,000 medical practices.*

Planned Parenthood New Hampshire Action Fund (PPNHAF) *is an independent, nonpartisan, not-for-profit organization formed as the advocacy and political arm of Planned Parenthood of Northern New England in New Hampshire. The Action Fund engages in educational and electoral activity, including voter education, grassroots organizing, and legislative advocacy.*

US Abortion Policies and Access After *Roe*

Source: Guttmacher Institute; https://states.guttmacher.org/policies/. Reflects state policies in effect as of January 29, 2023.

ACCESS TO ABORTION CARE ACT

January 2023

In June of 2022, the US Supreme Court overturned *Roe v Wade*, the landmark 1973 case that made abortion legal in all 50 states. Without this constitutional right, state politicians now have the ability to ban abortion entirely. Since *Roe* was overturned, 18 states have banned abortion, with abortion being completely unavailable in 14 states. At this time, 20 million people have lost access to abortion in their home state, including 1 in 3 women of reproductive age. This has created chaos and confusion in the health care landscape.

Now, more than ever, it's critical New Hampshire takes action to safeguard abortion access. The New Hampshire legislature has the opportunity to return to its long, bipartisan tradition of upholding privacy when it comes to personal medical decisions. New Hampshire has one of the highest levels of public support in the country when it comes to reproductive freedom, but with the shifting landscape of a post-*Roe* world, the New Hampshire legislature must act now. An individual's ability to access abortion care is a matter of equality and liberty for all Granite Staters.

With no federal constitutional protections in place, New Hampshire must make it clear to its residents and the nation that it is a state that values privacy, freedom, and individual decision-making by passing the Access to Abortion-care Act.

The Access to Abortion-care Act (AAA), House Bill 88 and SB 181, upholds long-held New Hampshire values by putting into law that the state cannot further interfere in the right to access abortion. This bill does not change any current New Hampshire abortion laws; it does, however, provide critical assurances to Granite State patients and families that they can work with their doctors to get the health care they need in the majority of situations.

The time to protect reproductive rights has never been more critical. New Hampshire remains the only state in New England without protections in state law for abortion access. The health care landscape in this country has been upended, creating an influx of patients to states where abortion is legal, increasing wait times, and legal limbo for many states. New Hampshire abortion providers have seen an increase in patients from banned states and will continue to in the coming months and years. It's clear from ballot initiatives across the country, from California and Vermont, to Kansas and Kentucky, that people support the right to have an abortion.

A broad coalition of health care advocates and organizations have signed on in support of the Access to Abortion-care Act, because we know its passage will protect access to safe, legal abortion in New Hampshire.

newfutures
advocate • educate • collaborate
to improve the health and wellness of all Granite Staters

January 31, 2023

The Honorable Sharon Carson, Chair
Senate Judiciary Committee
State House, Room 100
107 North Main Street
Concord, NH 03301

Re: New Futures' testimony in support of Senate Bill 181, relative to access to abortion care

Dear Senator Carson and Honorable Members of the Committee:

New Futures appreciates the opportunity to testify in support of SB 181 (relative to access to abortion care). New Futures is a nonpartisan, nonprofit health policy and advocacy organization that advocates, educates, and collaborates to improve the health and wellness of all New Hampshire residents. In this role, we work extensively with policy makers, health care providers and families to increase access to quality, accordable health care and to improve health equity across the Granite State.

New Futures stands in strong support of SB 181, as it would ensure access to critical reproductive care for individuals and families in need. In New Hampshire and across the country, reproductive care, including abortion, is a critical element of overall health care. With the overturning of *Roe v. Wade* in June 2022, however, one-third of women of reproductive age across the country has already lost access to abortion in her home state. Data is clear that restrictions on abortion have significant impacts on the health and wellness of women, children and families.

Research from The Turnaway Study out of the University of California San Francisco shows that:

- Years after an abortion denial, women were more likely to not have enough money to cover basic living expenses like food, housing and transportation.
- Women who were denied an abortion and gave birth reported more life-threatening complications like eclampsia and postpartum hemorrhage compared to those who received wanted abortions.
- Women who were denied an abortion and gave birth instead reported more chronic headaches or migraines, joint pain, and gestational hypertension compared to those who had an abortion.
- Children born as a result of abortion denial are more likely to live below the federal poverty level than children born from a subsequent pregnancy to women who received the abortion.

These impacts, among many others, are shown to disproportionately impact those already facing the greatest barriers to care, including those with lower incomes, residents of rural areas, people of color, women, LGBTQ+ individuals, people with disabilities and others.

By enshrining abortion rights in state law, SB 181 would increase access to these vital healthcare services for women and families, and they would support the health and wellness of our state. For these reasons, we ask that you support SB 181 and vote Ought to Pass. Please do not hesitate to contact me if you have any questions.

Respectfully submitted,

Jake Berry, Vice President of Policy, New Futures

Good afternoon, my name is Representative Alexis Simpson, Rockingham DIstrict 33, representing the people of Exeter, Stratham, Newmarket, and Newfields. I'm here as a cosponsor of SB 181. I will speak briefly as I know you have numerous others who would like to testify.

As Senator Perkins Kwoka has already stated, since we introduced this bill last year, the Roe v. Wade Supreme Court decision is no longer the law of the land. Since *Roe v. Wade* was overturned, I have heard from my constituents - and people across the state - that they are scared. They aren't sure if they will have access to the care they need- and they are scared of what the future looks like for their children. It may seem that these fears are overstated, but most of my constituents watch the national news. They have watched as state after state across the country have banned abortion early in pregnancy before people even know they are pregnant and in some cases banned abortion completely. In a time when people are uncertain about so many things–the cost of housing, electricity, and child care, to name a few–losing control over your body and the ability to make decisions about the security of your family's future is scary. As a mother myself, I understand those fears. There is no decision more critical than if, when, and how to start and grow a family.

We have an obligation to our constituents, the overwhelming majority of whom believe that decisions about reproductive and abortion care belong to pregnant people and the people who provide them care. Granite Staters are looking to us, their elected officials, right now for clarity and security. Access to abortion care up to 24 weeks is legal in NH, and we should reassure our constituents by securing this in statute. Passing the Access to Abortion-care Act will show the people that we understand what is at stake and that we trust them and their doctors.
