STATE OF NEW HAMPSHIRE

In the Year of Our Lord Two Thousand Twenty-Six

AN ACT limiting the use of certain facilities on the basis of sex and redefining the term "gender identity."

Be it Enacted by the Senate and House of Representatives in General Court convened:

1 1 Statement of Findings. The general court finds that:

2 I. Historically, society has protected females by reserving certain spaces for their exclusive
3 use and offering certain services only to women and children.

4 II. The inclusion of gender identity in the Civil Rights Act and the New Hampshire law
5 against discrimination was not intended to remove protections for females.

6 III. The following statutory changes are to be undertaken by the general court:

7 (a) Include "female" and "male" in the definitions section of New Hampshire state law,
8 using biology to determine the legal categories of female and male. To address intersex persons, the
9 language references the SRY gene which is required during fetal development to develop male
10 anatomy. To remove the need for genetic testing, those persons who do not meet the legal definition
11 of female will be considered male.

12 (b) Amend the definition of "gender-identity" to provide clarification on what is
13 considered "improper purpose" for assertion of gender identity. Accessing spaces or services offered
14 only to females on the basis of gender identity shall be defined as an improper purpose.

15 (c) All inmates shall be housed based upon sex.

16 2 Statutory Construction; Number; Gender; Sex Added. Amend RSA 21:3 to read as follows:

17 21:3 Number; Gender. Words importing the singular number may extend and be applied to
18 several persons or things; words importing the plural number may include the singular; and words
19 importing the masculine gender may extend and be applied to females. ***"Sex," "biologic sex," and***

21 ***I. "Female" is defined as an individual with a reproductive system of the type which***

23 ***functional Y chromosome. A functional Y chromosome is a Y chromosome which expressed***
24 ***the SRY gene during fetal development. A person with 46,XX/46,XY and functional ovarian***
25 ***tissue is a female.***

26 ***II. "Male" is defined as an individual with a reproductive system of the type which***
27 ***in normal function produce sperm. Male shall include any person who does not meet the***
28 ***definition of female.***
