METHODOLOGY:

This bill changes the annual registration fees for electric vehicles from a flat fee to one based on type and weight. Under current law, battery electric vehicles (BEVs) are \$100 and plug-in hybrid vehicles (PHEVs) are \$50, and this bill proposes the following:

Battery electric vehicle (BEV) Under 1,000 lbs	\$0
Battery electric vehicle (BEV) 1,001 - 3,000 lbs	\$50
Battery electric vehicle (BEV) 3,001 - 8,000 lbs	\$100
Battery electric vehicle (BEV) Over 8,000 lbs	\$150
Plug-in hybrid electric vehicle (PHEV) Any weight	\$50 (no change)

The Department of Safety states that based on current registration data, there are approximately 15,358 battery electric vehicles (BEVs) and 6,150 plug-in hybrid electric vehicles

(PHEVs) registered in the state. It is unknown if this bill will increase or decrease state revenue as vehicle weight data is not available to the Department. Also, pursuant to RSA 235:23 (“Apportionment A”), 12 percent of highway fund road toll and motor vehicle fee revenue collected is distributed to municipalities in the year following collection. Therefore, this bill would have an interminable impact on state highway fund expenditures and local revenue in FY 2028 and beyond.

The Department states there will be a one-time system change cost of \$45,000 in FY 2027 to implement this bill.
