METHODOLOGY:

This bill requires the Department of Health and Human Services to adjust the personal needs allowance for nursing home residents every year, rather than every five years as under current statute. The Department notes that nursing facility residents that receive Medicaid are expected to contribute part of their income to the cost of their care; the personal needs allowance is a small allowance that those residents are allowed to retain. An annual update to the personal needs allowance will therefore result in an indeterminable increase in state expenditures, since the Medicaid program will pay more for nursing facility services as the allowance increases due to inflation. There will be no fiscal impact in years ending in 0 or 5, as this is when the Department would adjust the allowance under current law. Since the Department is unable to predict inflation with a high degree of certainty, it assumes a cost increase of between \$50,000 and \$100,000 in FY26 and between \$100,000 and \$500,000 in subsequent years. This cost would be paid for with 50 percent state general funds and 50 percent matching federal funds.

In addition, the bill appropriates \$160,000 in FY26 for the purposes of making leave accrual or other payments related to staff transitions out of the state classification system at Hampstead Hospital. Finally, the bill establishes a Hampstead Hospital and residential treatment facility capital investment fund, which is authorized to accept up to \$3 million of revenue received through the lease of Hampstead Hospital. The fund may also accept federal or other funds approved by the Fiscal Committee, as well as funds appropriated as part of the state operating budget.
