SB 92-FN- FISCAL NOTE
AS AMENDED BY THE SENATE (AMENDMENT #2025-0400s)

AN ACT relative to the collection of birth worksheet information.

FISCAL IMPACT: This bill does not provide funding, nor does it authorize new positions.

Estimated State Impact				
	FY 2025	FY 2026	FY 2027	FY 2028
Revenue	\$0	\$0 to Indeterminable Decrease	\$0 to Indeterminable Decrease	\$0 to Indeterminable Decrease
<i>Revenue Fund(s)</i>	Federal Grants and Vital Records Improvement Funds			
Expenditures*	\$0	\$0	\$0	\$0
<i>Funding Source(s)</i>	None			
Appropriations*	\$0	\$0	\$0	\$0
<i>Funding Source(s)</i>	None			

***Expenditure = Cost of bill**

***Appropriation = Authorized funding to cover cost of bill**

METHODOLOGY:

This bill amends certain language regarding information collected by hospitals on the birth worksheet that the Division of Vital Records is authorized to share with the Centers for Disease Control (CDC).

The Department of State indicates the Division of Vital Records currently receives \$168,000 annually in federal funds from the CDC for birth and death statistics. This amount is deposited into the Vital Records Improvement Fund. Of this funding, \$75,600 (or 45%) is allocated for birth-related activities. According to the CDC, failure to provide this information may result in New Hampshire receiving only 10% of the birth funding in the future, translating to a potential loss of \$68,000 per year. Given the CDC's use of the term "may," the Department cannot precisely determine the fiscal impact. Furthermore, the bill could impact the funding the division receives from DHHS through federal grants.

The Department of Health and Human Services states that if the Department cannot receive essential data elements, such as the mother's date of birth, it may lead to conflicts with reporting requirements and uncertainties regarding the recording of birth records, potentially impacting programs and public services for New Hampshire residents, including maternal and child health programs and federal funding.
