METHODOLOGY:

This bill modifies cremation and death certification procedures in New Hampshire. It establishes requirements for medical examiners to conduct inquiries and issue certificates before cremation, adjusts documentation protocols for cremation, and removes the requirement for the certifying individual to have viewed the deceased within 24 hours of death.

The Department of Justice states this bill will reduce General Fund expenditures by an estimated \$100,000 to \$500,000 or less, per year, due to reduced travel reimbursement. These travel expenditure reductions are due to the requirement to no longer perform body views where available medical evidence suggests no reason to delay a cremation.
