METHODOLOGY:

This bill establishes the Water Well Board Fund as a special, nonlapsing, continually appropriated fund in the state treasury. All fees, fines, and civil penalties collected under RSA 482-B would be deposited into this fund rather than the General Fund. The fund would be used to support the operations and duties of the Water Well Board and is effective January 1, 2027.

The Department of Environmental Services states the Joint Legislative Committee on Administrative Rules recently approved a rule allowing the Water Well Board to charge a \$100 fee for each well completion report filed. Based on an average of 2,426 well completion reports submitted annually, the fee is expected to generate approximately \$242,600 in annual revenue beginning July 1, 2026 (FY 2027). Currently, annual fee collections total approximately \$43,480 and are deposited into the General Fund. In addition, one full-time position (#18464) that administers the Water Well Board is funded by the General Fund at an annual cost of \$103,141 in FY 2027.

Under this bill, all Water Well Board-related revenues including the existing \$43,480 and the new fee revenue will be deposited into the newly created Water Well Board Fund rather than the General Fund effective January 1, 2027. The total estimated revenue to the new fund in FY 2027 is approximately \$242,600, reflecting the Board's revised fee structure and the consolidation of prior General Fund revenue. The position, which is currently funded through the General Fund, will instead be supported by the Water Well Board Fund. Due to the effective date occurring midway through FY 2027, it is assumed there will be no change to General Fund expenditures in FY 2027. Revenue collected in FY 2027 is assumed to be deposited into the General Fund during the first half of the year and into the Water Well Board Fund during the second half of the year. Beginning in FY 2028 and continuing thereafter, the position is assumed to be fully funded by the Water Well Board Fund, resulting in a reduction in General Fund expenditures, and all associated revenue is assumed to be deposited into the Water Well Board Fund, resulting in a reduction in General Fund revenue.
