

Dear Legislators,

The health of our New Hampshire lakes is a critical part of the state's economic well-being. Maintaining the purity and beauty of the lakes by initiating and continuing measures to mitigate against toxic cyanobacteria and invasive species will:

- **Protect the property values** of New Hampshire residents;
- Help continue to **help drive the \$7.5 billion in visitor spending**; and
- Provide a large portion of the roughly **\$465 million annual tax in the Rooms and Meals taxes** for the General and Education Funds.

Please support this bill!

Keith R. Nelson, Moultonborough, NH
