

For consideration by the representatives of the NH Election Law committee,

Regarding 2026 House Bill HB 1600; I am writing to ask you to consider **approving** this bill because providing the opportunity to register to vote at the same time as licensing shall help clarify the documentation requirements. This will make registering to vote easier, timelier for our citizens and will save time at the voting polls.

Thank you very much for your attention, hard work and consideration for the future of this bill that will help potential voters and help reduce time spent by volunteers at the polls.

Respectively,

Virginia Notter
