

HB1114 1/22/26 10:15 AM Legislative Administration Committee

I urge the legislature to approve this bill as it will strengthen the voices of their constituents, the very people the legislators are sworn to serve. There have been many documented instances of overwhelming numbers of support for, and opposition against bills that have seemingly been completely ignored by our leaders in office, and this has to stop. I am also aware of at least one statement disparaging public input completely by a current member of this legislature. What is the purpose of a citizen-led legislature if not to listen to the will of its citizens?

There are so very many concerned citizens who closely monitor the bills coming forward and we want our voices heard. The decisions made by those of you in power affect us on a daily basis and we are well aware of this. The least the legislators can do is to note, reflect, record, and take our input seriously. I strongly request that you vote this bill as Ought to Pass.
