

I Oppose HB1792

Honorable Representatives:

This bill is about putting ideology before science. This is a bill that is concentrating states' power over local control. This is a bill that engenders the opinions marginalizing people in NH.

State control only occurs when a topic conflicts with a state agenda. And especially when science supports the topic.

Why not allow the discussion about why the topic disagrees with the science and let the student learn how to have an informed opinion?

What is so threatening about a student who can have her own rational thought?

Why make topics about people illegal other than to label a person?

Please oppose this bill for the respect for the NH Constitution: "all government of right originates from the people, is founded in consent, and instituted for the general good."
