

I Oppose HB1811

Honorable Representatives:

I never had polio. Because of my age, I did have measles (common and German) as well as mumps.

And I didn't realize boys my young age of 6, 7 and 9 were dying because they had those diseases.

Which are preventable with a vaccine.

At a time when pro-life is a buzzword, this is anti-family and anti-life.

When a political agenda replaces sound science, the destruction of society follows.

The US is already being questioned whether measles is now able to be eliminated because of other states making vaccinations optional.

And vaccinated children have died because other children were not and became ill.

I don't want my grandchildren to live in a dystopian world where they have to now fear because preventable illnesses can be stopped.

Please oppose this bill for the respect for the NH Constitution. "all government of right originates from the people, is founded in consent, and instituted for the general good."

Leonard Campbell
