The DNA record is the objective form of the DNA analysis test and may include numerical representation of DNA fragment lengths, digital images of autoradiographs, discrete allele assignment numbers, and similar characteristics obtained from a DNA sample which are of value in establishing the identity of individuals. A DNA record may not specify the presence, absence, or alteration of any gene or chromosome.

VI. DNA sample means a blood, tissue, or hair follicle sample provided by any person or submitted to the division pursuant to this subdivision for analysis or storage or both.

VII. FBI means the Federal Bureau of Investigation.

VIII. Juvenile sexual offender means a person who has been found delinquent because of actions which, if the person were an adult, would be crimes under subparagraph IX(a).

IX. Sexual offender means a person who has been convicted of any violation of:

(b) A law of another state or the federal government reasonably equivalent to a violation listed in subparagraph (a).

I. Before the release of any sexual offender after conviction, or of any juvenile sexual offender after finding of delinquency, whether on probation, conditional or unconditional release, completion of sentence, or release for any other reason, such person shall have a DNA sample taken for analysis to determine identification characteristics specific to the person.

II. Any person convicted of the commission of a violent crime as defined in RSA 651-C:1, X shall, after conviction, have a DNA sample taken for analysis to determine identification characteristics specific to the person.

III. The analysis shall be performed under the direction of the division, following procedures in conformance with the federal DNA Identification Act of 1994. Identifying characteristics of the resulting DNA profile shall be stored and maintained by the division in a DNA database compatible with the CODIS system. Information in the database shall be made available only as provided in RSA 651-C:3.

IV. The division shall prescribe procedures compatible with the Federal Bureau of Investigation's requirements for the CODIS program, to be used in the collection, submission, identification, analysis, storage, and disposition of DNA samples and records obtained pursuant to this subdivision.

Such law enforcement officers shall use such information only for the purposes of criminal investigations and prosecutions, or as necessary to the functions of an office of chief medical examiner. A request may be made by personal contact, mail, or electronic means. The name of the person making the request and the purpose for which the information is requested shall be maintained on file with the division.

II. The commissioner of the department of safety shall adopt rules under RSA 541-A to govern the methods of obtaining information from the state DNA database and CODIS and procedures for verification of the identity and authority of the requester.

III. Upon request, a copy of the request for a search shall be furnished to any person identified and charged with an offense as the result of a search of information in the database. Only when a DNA sample or record supplied by the person making the request satisfactorily matches a profile in the database shall the existence of data in the database be confirmed or identifying information from the database be disseminated.

IV. The division shall create a separate statistical database comprised of DNA records of persons whose identities are unknown. Nothing in this subdivision shall prohibit the department from sharing or otherwise disseminating the information in the statistical database with law enforcement or criminal justice agencies within or without the state.

Except as authorized by law, any person who, for purposes of having a DNA analysis performed, obtains or attempts to obtain any sample submitted to the forensic science laboratory for analysis shall be guilty of a class B felony.

The department shall purge all records and identifiable information in the database pertaining to the person and destroy all samples from the person upon receipt of a written request for expungement pursuant to this section and a certified copy of the court order reversing and dismissing the conviction.

II. The DNA record of any juvenile sexual offender shall be maintained in the database and shall not be automatically expunged from the database upon that individual reaching the age of adulthood.

2 Repeal. RSA 632-A:20 through 632-A:24, relative to DNA testing of sexual offenders, is repealed.
