Amendment to HJR 5

Amend the resolution by replacing all after the title with the following:

Whereas, the cost and performance benefits of incorporating renewable energy technologies such as daylighting, photovoltaics, active solar water heating, or wind, biomass and hydroelectric energy systems in state construction projects have been evaluated and recommended in other states; and

Whereas, over the life of a building, the energy cost savings due to the use of renewable energy systems may outweigh increased construction costs; and

Whereas, policies that require or encourage the consideration of renewable energy options in the construction or rehabilitation of state buildings are a potentially important mechanism for promoting the increased use of renewable energy in other areas of the state; and

Whereas, current regulatory codes affecting construction do not adequately facilitate the use of renewable energy technologies in the construction or rehabilitation of buildings; now, therefore, be it

Resolved by the Senate and House of Representatives in General Court convened:

That the general court hereby encourages the evaluation and use of renewable energy options in the construction and rehabilitation of all state buildings where feasible; and

If the patient is in a skilled nursing facility or nursing facility certified under Title XVIII or Title XIX of the Social Security Act, the statement shall inform the patient of his or her right to request an administrative hearing before the department of health and human services.

Except as specified in paragraph II(b) of this section, written notice of transfer or discharge shall be given at least 30 days before the resident is transferred or discharged. The documentation of the basis for the transfer or discharge shall be made by:

- (1) The patient's physician or advanced registered nurse practitioner (ARNP) if the transfer or discharge is necessary because the patient's needs cannot be met in the facility;

- (2) The patient's physician or advanced registered nurse practitioner (ARNP) if the transfer or discharge is appropriate because the patient's health has improved sufficiently so the patient no longer needs the services provided by the facility;

- (3) A physician or advanced registered nurse practitioner (ARNP) if the health of individuals in the facility would be endangered.

III. Transfer or discharge of a patient of a skilled nursing facility or nursing facility certified under Title XVIII or Title XIX of the Social Security Act shall take into account any additional rights and safeguards prescribed by the commissioner of the department of health and
