CONSENT CALENDAR REPORTS

EXECUTIVE DEPARTMENTS AND ADMINISTRATION

SB 437, relative to local authority to amend the state building code.

Ought to Pass with Amendment, Vote 5-0.

Senator Carson for the committee.

SB 437 requires all local ordinances amending the state building code to comply with the procedures in law for review and approval of additional local regulations to the state building code established in RSA 155-A. The bill will require local amendments to the building code to be submitted for review by the state building code review board, who will catalog local changes. The committee heard testimony from contractors that the bill would allow easier access to municipalities' building code amendments.

SB 484-FN, relative to completion of the birth worksheet for hospital or institutional birth.

Ought to Pass, Vote 5-0.

Senator Rosenwald for the committee.

SB 484 defines the information and procedures for obtaining and recording information for the birth certificate and health information collected after a hospital or institutional birth. The bill would ensure that the Department of Health and Human Services will still have the same access to birth certificate information they currently have. The bill ensures health information is sent to the division of Vital Records for public health program use by DHHS but eliminates the sending of a few personal identifiers. The bill would ensure that the personally identifiable information required by the Centers for Disease Control would continue to be sent, which will maintain the state's access to federal grant funds.
