

Senate Election Law Redistricting Committee

You are elected to serve all the people not only those who share your specific opinions. For us to have a truly working democracy all voices must be heard equally. The senate district maps in the majority party redistricting proposal do not serve that end. They are obviously geared to keep majority senators in power and move us further to single party rule, like Russia. This is a betrayal of your oath of office, an insult to all the voters of New Hampshire, and a further deterioration of the democracy that made this one of the greatest countries on earth. You are there to serve the Common Good, not individual interests. Stop this charade and make the maps fair and competitive for all districts.
