Health and Human Services Oversight Committee
New Hampshire State House Rm 205
107 North Main Street
Concord, NH 03301

Dear Honorable Members,

I write this letter to provide you with an annual report on SB298 established as a permanent commission in 2014. Our mission is printed above and our membership is listed in the margin. We continue to meet on the third Thursday of each month at the Walker Building, Room 100, 21 Fruit Street, Concord, NH.

In the past year, the commission attended numerous events throughout New Hampshire to gather information and provide education. We completed data collection from our second survey that was designed to aid in the development of targeted and relevant life style, employment, and health opportunities for NH Veterans, Service Members, and their families. Our lead analyst unfortunately resigned from the commission prior to providing a full assessment of the results. We have raw data and are in the process of finding someone to do analysis.

The commission supported a University of New Hampshire grad student who designed a survey to assess the impact of providers who attended military culture training. Data from that survey is still pending as of this writing. In the months to come, we will analyze the data from the survey and revise our strategic plan to increase access to care and quality of care for veterans and service members who experience post-traumatic stress disorder and / or traumatic brain injury.

Respectfully,

Colonel Richard F. Oberman
Chair
